FD TRINITRON® COLOUR VIDEO TV

SONY®

TV Section

TV system:
I

Colour system:
PAL, SECAM
NTSC 3.58, 4.43 (only Video In)

Channel Coverage:
UHF: B-21, B69

Picture Tube:
- KV-14FV1U:
  Flat Display Trinitron.
  14" (approx. 37 cm. measured diagonally)
- KV-21FV1U:
  Flat Display Trinitron.
  21" (approx. 55 cm. measured diagonally)

VCR Section

Format:
VHS Standard

Video recording system:
Rotary 2-head helical scanning system

Audio recording system:
Monaural

Video signal:
This Video TV is designated to receive TV programmes based on PAL (I) colour system and to record and play on PAL system. The Video TV can also play tapes on NTSC colour system.

Tape speed:
PAL:
SP: 23.39 mm/sec.
LP: 11.70 mm/sec.

NTSC (playback only):
SP: 33.35 mm/sec.
LP: 11.12 mm/sec.

Maximum recording time:
SP: 4 hours with E-240 tape
LP: 8 hours with E-240 tape

General

Rear Terminals
1/ 21-pin scart connector (CENELEC standard) including audio/video input, RGB input, TV audio/video output.

Front Terminals
2 video input – phono jack
2 audio input – phono jack
headphones jack

Clock
Quartz locked

Clock back up
Approx. 7 days

Power requirements
220-240 V AC, 50Hz

Sound Output:
1 x 6W (music power)
1 x 3W (RMS Mono)

Power Consumption:
- KV-14FV1U: 86 W
- KV-21FV1U: 107 W

Standby Power Consumption:
< 2 W

Dimensions:
- KV-14FV1U: Approx. 375 x 398 x 407 mm.
- KV-21FV1U: Approx. 489 x 500 x 477 mm.

Weight:
- KV-14FV1U: Approx. 15.6 Kg.
- KV-21FV1U: Approx. 27.2 Kg.

Accessories supplied:
1 Remote Control (RM-C815)
2 Batteries (IEC designated)

Other features:
Teletext, Fastext, TOPtext
Sleep Timer
Wake UP Timer
Parental Lock
Auto Head Cleaner
Dial Timer
VideoPlus+

Design and specifications are subject to change without notice.

CAUTION

SHORT CIRCUIT THE ANODE OF THE PICTURE TUBE AND THE ANODE CAP TO THE METAL CHASSIS, CRT SHIELD, OR CARBON PAINTED ON THE CRT, AFTER REMOVING THE ANODE.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK ⚠ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY. CIRCUIT ADJUSTMENTS THAT ARE CRITICAL FOR SAFE OPERATION ARE IDENTIFIED IN THIS MANUAL. FOLLOW THESE PROCEDURES WHENEVER CRITICAL COMPONENTS ARE REPLACED OR IMPROPER OPERATION IS SUSPECTED.

ATTENTION

APRES AVIOR DECONNECTE LE CAP DE L'ANODE, COURTCIRCUITER L'ANODE DU TUBE CATHODIQUE ET CELUI DE L'ANODE DU CAP AU CHASSIS METALLIQUE DE L'APPAREIL, OU AU COUCHE DE CARBONE PEINTE SUR LE TUBE CATHODIQUE OU AU BLINDAGE DU TUBE CATHODIQUE.

ATTENTION AUX COMPOSANTS RELATIFS À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET PAR UNE MARQUE ⚠ SUR LES SCHÈMAS DE PRINCIPE, LES VUES EXPLOSÈES ET LES LISTES DE PIECES SONT D'UNE IMPORTANCE CIRTIQUE POUR LA SÈCURITÈ DU FONCTIONNEMENT. NE LES REMPLACER QUE PAR DES COMPOSANTS SONY DONT LE NUMÈRO DE PIÈCE EST INDIQUÈ DANS LE PRÈSENT MANUEL OU DANS DES SUPPLÈMENTS PUBLIÈS PAR SONY. LES RÉGLAGES DE CIRCUIT DONT L'IMPORTANCE EST CRITIQUE POUR LA SÉCURITÉ DU FONCTIONNEMENT SONT IDENTIFIÉS DANS LE PRÉSENT MANUEL. SUIVRE CES PROCÉDURES LORS DE CHAQUE REMPLACEMENT DE COMPOSANTS CRITIQUES, OU LORSQU'UN MAUVAIS FONCTIONNEMENT EST SUSPECTÉ.

SELF DIAGNOSTIC FUNCTION

1. OUTLINE

- The units in this manual contain a self-diagnostic function.
- If an error occurs, the STANDBY lamp will automatically begin to flash.
  The number of times the lamp flashes translates to a probable source of the problem. A definition of the STANDBY lamp flash indicators is listed in the instruction manual for the user's knowledge and reference.
- If an error symptom cannot be reproduced, the remote commander can be used to review the failure occurrence data stored in memory to reveal past problems and how often these problems occur.

2. DIAGNOSTIC TEST INDICATORS

- When an errors occurs, the STANDBY lamp will flash a set number of times to indicate the possible cause of the problem. If there is more than one error, the lamp will identify the first of the problem areas.
- Result for all of the following diagnostic items are displayed on screen. No error has occured if the screen displays a "0".

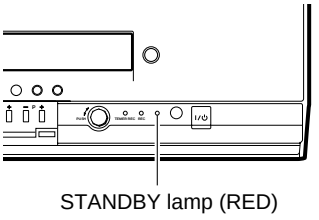
Diagnostic Item Description	No. of times STANDBY lamp flashes	Self-diagnostic display/Diagnostic result	Probable Cause Location	Detected Symptoms
• Power does not turn on	Does not light	—	• Power cord is not plugged in. • Fuse is burned out F1701	• Power does not come on. • No power is supplied to the TV. • AC power supply is faulty.
• +B overcurrent (OCP) or overvoltage (OVP)	2 times	2 : 0 or 2 : 1 4 : 1] at the same time (Note 1)	• FBT • Q802 (H OUT) shorted	• On standby state. • Load on power line is shorted (at the same time 4 : 1 on display).
• Vertical deflection stopped	4 times	4 : 0 or 4 : 1	• IC501 • IC301 ⑭ pin • IC606 • Q802 (H OUT) shorted • Q803 • Q608 • R803 open	• Has entered standby state after horizontal raster. • Vertical deflection pulse is stopped. • Horizontal deflection stopped. • Power line is shorted or power supply is stopped.
• White balance failure (no PICTURE)	5 times	5 : 0 or 5 : 1	• CRT • IC301 • Q701 - Q717 (CVM board) • G2 is improperly adjusted. (Note 2)	• No raster is generated. • CRT cathode current detection reference pulse output is small.

Note 1: If a + B overcurrent is detected, stoppage of the vertical deflection is detected simultaneously.
The symptom that is diagnosed first by the microcontroller is displayed on the screen.
Note 2: Refer to screen (G2) Adjustment in section 3-4 of this manual.

• VCR EMG code List

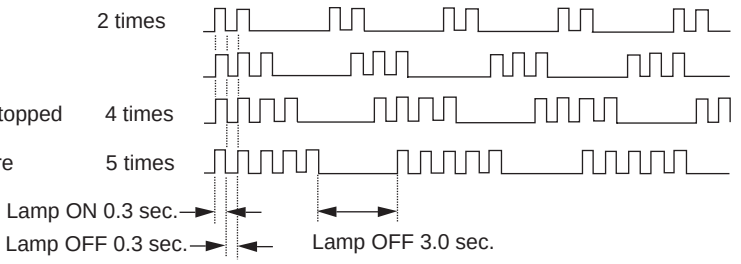
Code	Coutents	Code	Coutents
00h	NO EMG	30h	Capstan FG NG at initial
10h	CAM encode NG during unloading	31h	Capstan FG NG
11h	CAM encode NG during unloading	40h	Drum FG NG
12h	CAM encode NG at intial	41h	Drum FG NG at initial
20h	T reel NG during unloading	42h	Drum FG NG
21h	S reel FG NG	43h	Drum PG NG
22h	T reel FG NG	44h	Drum PG NG
23h	S reel FG NG	50h	DEW
24h	T reel FG NG at initial	60h	FL NG
25h	S reel FG NG at initial	70h	DEW eject NG

3. DISPLAY OF STANDBY LIGHT FLASH COUNT



* One flash count is not used for self-diagnostic.

< Diagnostic Item >	< Flash Count >
• +B OCP/OVP	2 times
• Vertical deflection stopped	4 times
• White balance failure	5 times



STOPPING THE STANDBY FLASH

• Turn off the power switch on the TV main unit or unplug the power cord from the outlet to stop the STANDBY lamp from flashing.

4. SELF-DIAGNOSTIC SCREEN DISPLAY

• For errors with symptoms such as “power sometimes shuts off” or “screen sometimes goes out” that cannot be confirmed, it is possible to bring up past occurances of failure for confirmation on the screen:

[To Bring Up Screen Test]

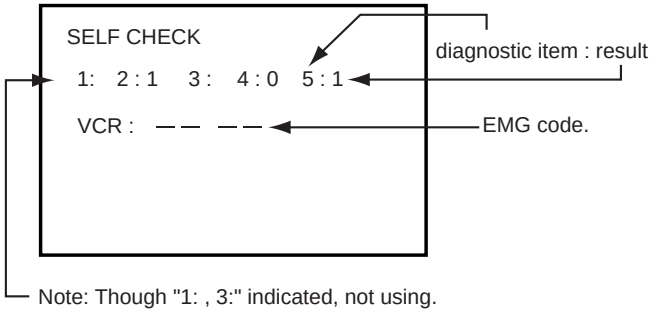
• In standby mode, press buttons on the remote commander sequentially in rapid succession as shown below:

Screen display (i+) ➡ channel 5 ➡ Sound volume - ➡ Power ON ⏻

⇧

Note that this differs from entering the service mode (mode volume +).

Self-Diagnosis screen display



Numeral "0" means that no fault has been detected.

Numeral "1" means a fault has been detected.

Note: Though "1: , 3:" indicated, not using.

5. HANDLING OF SELF-DIAGNOSTIC SCREEN DISPLAY

• Since the diagnostic results displayed on the screen are not automatically cleared, always check the self-diagnostic screen during repairs. When you have completed the repairs, clear the result display to “0”.

• Unless the result display is cleared to “0”, the self-diagnostic function will not be able to detect subsequent faults after completion of the repairs.

[Clearing the result display]

• To clear the result display to “0”, press buttons on the remote commander sequentially as shown below when the diagnostic screen is being displayed.

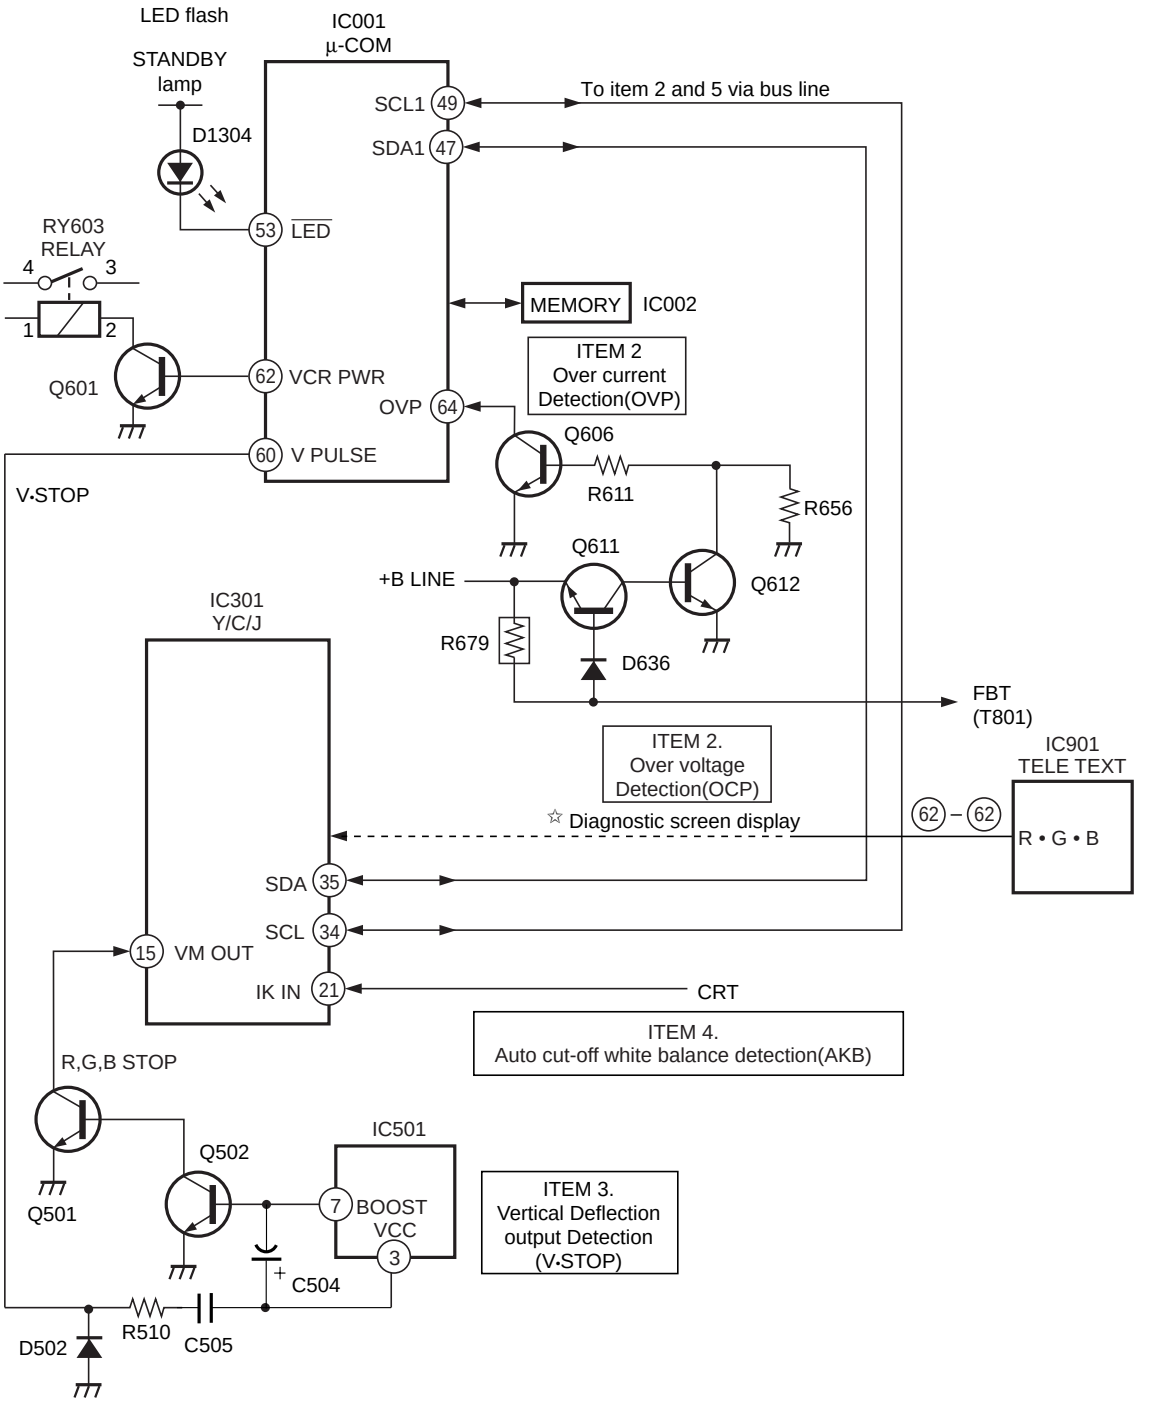
• Pay attention when perform by the service mode, other all electric adjustment data will be rewrite.

Channel 8 ➡ 0

[Quitting Self-diagnostic screen]

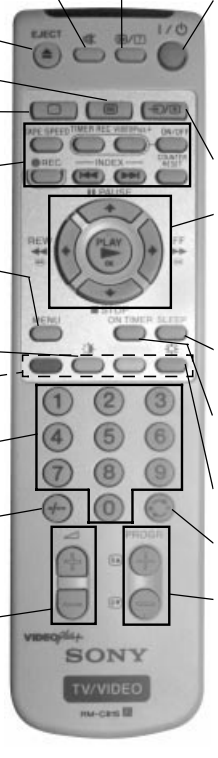
• To quit the entire self-diagnostic screen, turn off the power switch on the remote commander or the main unit.

6. SELF-DIAGNOSTIC CIRCUIT



+B overcurrent	Owing to current increase voltage of R679 decrease and that it make Q611 and Q612 to become LOW and OFF RY601.
+B over voltage	When +B voltage become more than 142.5V, Q611 and Q612 pin become LOW and RY601 OFF.
Vertical deflection stopped	Detect Vertical deflection Pulse lost by IC001 ⑥⓪ pin of micro computer. Mute the picture at ⑮ pin of IC301 that performed by Y/C/J.
White balance	Detect when R.G.B. output wrong level balance of automatic white balance detecting standard pulse which detect cathode current, or which become low almost.

Overview of Remote Control Buttons



Muting the Sound
Press to mute TV sound. Press again to restore the sound.

Displaying on Screen information
Press once to display On-Screen indications (first level).
Press twice to display On-Screen indications (second level)
Press a third time to cancel.

Ejecting a videotape
Press to eject the videotape

Temporally Switch Off the Video TV
Press to temporarily switch off the Video TV (the standby indicator ⏻ on TV lights up). Press again to switch on the Video TV from standby mode.

⚠ By using this button to turn off the Video TV instead of the Main Power on/off button, settings will not be cleared unless that the power is interrupted or you disconnect the AC power cord. In that case settings will be cleared after 7 days.

Selecting Teletext
Press to switch on teletext.

Selecting TV mode
Press to switch off teletext or video input.

Selecting input source
Press repeatedly until the desired input symbol of the source appears on the TV screen.

VCR Operation buttons
For details refer to "VCR Operation" section of this instruction manual.

- *When MENU is switched on:*
  Use these buttons to operate the menu system. For details refer to "Introducing and Using the Menu System" of this instruction manual (see page 7).
- *When MENU is switched off and a tape is inserted:*
  Use these buttons to operate VCR. For details refer to "Playing a Tape and Additional Tasks" section of this instruction manual (see page 10).

Displaying the menu system
Press to display the menu on the TV screen. Press again to remove the menu display from the TV screen.

Sleep Timer
For details refer to "Switching Off the Video TV Automatically (Sleep Timer)" section of this instruction manual (see page 9).

Selecting Picture mode
Press repeatedly to change the picture mode.

Fastext buttons
For details refer to "Teletext" section of this instruction manual.

On Timer
For details refer to "Switching On the Video TV Automatically (On Timer)" section of this instruction manual (see page 9).

Selecting channels
Press to select channels.

Selecting the TV Screen format
Press to view programmes in 16:9 mode. Press again to return to Normal (4:3) mode.

For double-digit programme numbers, e.g. 23, press -/-- first, then the buttons 2 and 3. If you enter an incorrect first digit, this should be corrected by entering another digit (0-9) and then selecting -/-- button again to enter the programme number of your choice.

Back to the channel last watched
Press to watch the last channel selected (watched for at least 5 seconds).

Selecting channels
Press to select the next or previous channel.

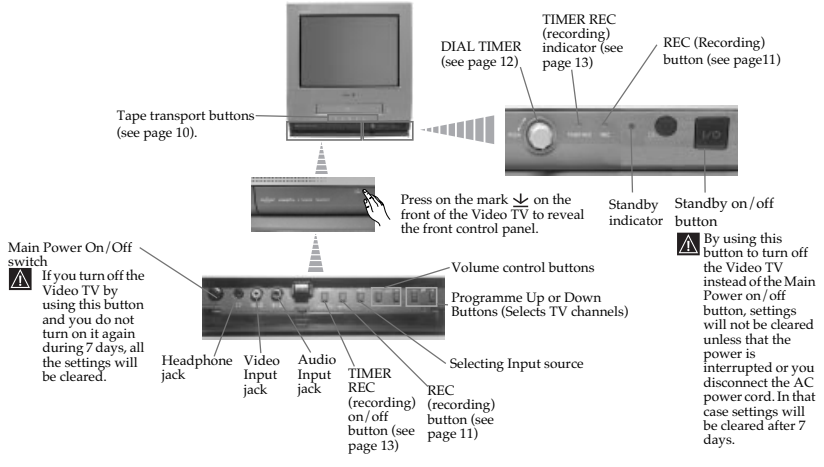
Adjusting TV volume
Press to adjust the volume of the TV.

ⓘ Besides TV functions, all buttons with green symbols are also used for Teletext operation. For more details, please refer to ""Teletext" section of this instruction manual (see page 18).

SECTION 1
GENERAL

The operating instructions mentioned here are partial abstracts from the Operating Instruction Manual. The page numbers of the Operating Instruction Manual remein as in the manual.

Overview of Video TV Buttons



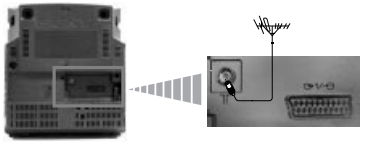
GB

Inserting Batteries into the Remote Control

⚠ Make sure to insert the supplied batteries using the correct polarities.
Always remember you dispose of used batteries in an environmental friendly way.

Connecting the Aerial

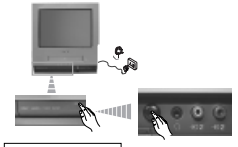
ⓘ Connecting cables are not supplied.



Switching On the Video TV and Automatically Tuning

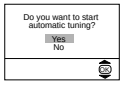
The first time you switch on your TV, a sequence of menu screen appear on the TV enabling you to: 1) choose the language of the menu screen, 2) search and store all available channels (TV Broadcast), 3) change the order in which the channels (TV Broadcast) appear on the screen and 4) confirm the clock setting.
However, if you need to change any of these settings, you can do that by selecting the appropriate menu in the (Set Up).

1 Connect the TV plug to the mains socket (220-240V AC, 50Hz)
Press the main on/off button on the TV set to turn on the Video TV.
The first time you press this button, a Language menu displays automatically on the TV screen.

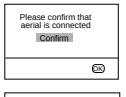


2 Press the or button on the remote control to select the language, then press the **OK** button to confirm your selection. From now on all the menus will appear in the selected language.

3 The **Auto Tuning** menu appears on the screen. Press the **OK** button to select **Yes**.

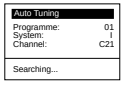


4 A new menu appears on the screen asking you to check that the aerial is connected. Ensure the aerial is connected and then press the **OK** button.



The Video TV starts to automatically search and store all available channels (TV Broadcast) for you.

This procedure could take some minutes. Please be patient and do not press any button. Otherwise the automatic tuning will not be completed.



5 After all available channels are captioned and stored, the **Programme Sorting** menu appears automatically on the screen enabling you to change the order in which the channels appear on the screen.

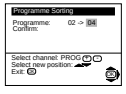
a) If you do not wish to change the channel order, press **OK** and go to step 6.

b) If you wish to change the channel order:

1 Press the **PROGR +** or **-** button to select the programme number with the channel (TV Broadcast) you wish to rearrange appears on the screen.

2 Press the or button to select the new programme number position for your selected channel (TV Broadcast), then press the **OK** button.

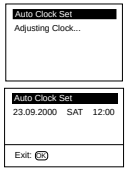
The word **Confirm** is highlighted for a few seconds to confirm that the new programme position is stored.



3 Repeat steps b)1 and b)2 if you wish to change the order of the other channels.

4 When you finish to rearrange the order of the channels, press **OK**.

6 The Video TV adjusts itself automatically clock setting, and after few seconds date and time settings are displayed.
If you want to change the time settings, you can adjust it manually through the menu system (for details, see "Setting the Clock Manually" section of this instruction manual (see page 7).



7 Press the **MENU** button to remove the menu from the screen.

Your Video TV is now ready for use

Introducing and Using the Menu System

Your Video TV uses an on-screen menu system to guide you through the operations. Use the following buttons on the Remote Control to operate the menu system:

1 Press the **MENU** button to switch the first level menu on.

2 • To highlight the desired menu or option, press or .
- To enter to the selected menu or option, press .
- To return to the last menu or option, press .
- To alter settings of your selected option, press / / or .
- To confirm and store your selection, press **OK**.

3 Press the **MENU** button to remove the menu from the screen.

Picture Adjustment

The "Picture Adjustment" menu allows you to alter the picture adjustments.

To do that: by using the menu system and after selecting the item you want to alter press , then press repeatedly / / or to adjust it and finally press **OK** to store the new adjustment.
This menu also allows you to customise the picture mode based on the programme you are watching:

Live (for live broadcast programmes).
Movie (for films).
Personal (for individual settings).

- ***Brightness, Colour*** *and* ***Sharpness*** *can only be alterated if "Personal" mode is selected.*
- ***Hue*** *is only available for NTSC colour signal (e.g: USA video tapes).*
- *Select* ***Reset*** *and press* ***OK*** *to reset the picture to the factory preset levels.*

GB

Setting The Clock Manually

The "Clock" option in the "Timer" menu allows you to set manually the clock whilst you are in TV mode.

To do that: by using the menu system and after selecting the option press , then :

1 With **Auto Adjust** highlighted, press and next press or to select **Off**. Next press **OK**.

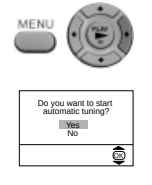
2 Select **Manual Adjust** and press . With the day column highlighted, press or to set the date, then press and proceed in the same way to set the month, year, hour and minutes. Finally press **OK**.

- *It is important you to set correctly the clock to use Timer Recording, Quick-Timer recording and On Timer functions.*
- *If power is interrupted or you turn off the Video TV by using the main On/off power switch or you disconnect the AC power cord, after 7 days will cause these settings to be cleared.*
- *To automatically set the clock, and whilst you are in TV mode select "Auto Adjust" "On" in the step above and in the "Programme" option select the from which programme number you want to get the time.*
- *Because the Video TV gets clock settings from teletext signals (sent by broadcasters), even you have selected Auto Adjust "On", we recommend you to check after summertime and wintertime that clock settings are correct, if not adjust it manually.*

Automatically Tuning The Video TV

The "Auto Tuning" option in the "TV Set Up" menu allows you to automatically search for and store all available TV channels.

To do that: by using the menu system and after selecting the option, press and then proceed in the same way as in the section "Switching On the Video TV and Automatically Tuning". (see page 6, steps 3 and 4).



Changing The Programme Order Of The TV Channels

The "Programme Sorting" option in the "TV Set Up" menu allows you to change the order in which the channels (TV Broadcast) appear on the screen.

To do that: by using the menu system and after selecting the option, press ▶ and then proceed in the same way as in the section "Switching On the Video TV and Automatically Tuning" (see step 5b) on page 6).

Manually Tuning The TV

The "Manual Programme Preset" option in the "TV Set Up" menu allows you to preset channels one by one to the programme order of your choice. To do that:

1. By using the menu system and after selecting the "Manual Programme Preset" option, press ▶. Then with **Programme** option highlighted press ▶. Press ▼ or ▲ to select on which programme number you want to preset the channel. Then press ◀.
2. After selecting the **Channel** option, press ▶. Then press ▼ or ▲ to select the channel tuning ("C" for terrestrial channels or "S" for cable channels). Next press ▶. After that, press the number buttons to enter directly the channel number of the TV Broadcast. If you do not know the channel number, press ▼ or ▲ to search for it. When you tune the desired channel, press **OK** twice to store.

- *Repeat all the above steps to tune and store more channels.*

Fine Tuning Channels

Normally the Automatic Fine Tuning (AFT) is operating, however by using the "Manual Programme Preset" option in the "TV Set Up" menu you can manually fine tune the Video TV to obtain a better picture reception in the case that the picture is distorted.

To do that: while watching the channel (TV Broadcast) you wish to fine tune, and by using the menu system select the "Manual Programme Preset" option. Press ▶. With the **AFT** option highlighted, press ▶. Next press ▼ or ▲ to adjust the fine tuning between -15 and +15. Finally press **OK** twice to store.

Skipping Programme Positions

The "Manual Programme Preset" option in the "TV Set Up" menu allows you to skip any unwanted programme numbers when they are selected with the PROGR +/- buttons.

To do that: by using the menu system and after selecting the "Manual Programme Preset" option, press ▶. Then with the **Programme** option highlighted press ▶. Next, press ▼ or ▲ to select the programme number you want to skip. Press ◀. Then, select the **Skip** option and press ▶. Next press ▼ or ▲ to select **Yes**. Finally press **OK** twice to confirm and store.

- *To cancel this function afterwards, select "No" instead of "Yes" in the step above.*

Setting Pay-TV Channels

The "Manual Programme Preset" option in the "TV Set Up" menu allows you to watch Pay-TV channels by connecting a Pay-TV decoder to the Scart connector ⇨1/⇦ placed on the rear of the Video TV.

To do that: by using the menu system and after selecting the "Manual Programme Preset" option, press ▶. Then with the **Programme** option highlighted, press ▶. Next press ▼ or ▲ to select the programme number with the scrambled channel and press ◀. Select the **Decoder** option and press ▶. Next press ▼ or ▲ to select **On**. Finally, press **OK** twice to confirm and store.

- *While you are recording a programme which is being recorded through the Pay-TV decoder, you will not be able to view other programmes through the decoder.*

Selecting The Language Of The Menu Screens

The "Language" option in the "Set Up" menu allows you to select the language that the menus are displayed in.

To do that: by using the menu system and after selecting the option, press ▶ and then proceed in the same way as in the section "Switching On the TV and Automatically Tuning" (see page 6, step 2).

Locking The Video TV

The "Parental Lock" option in the "Set Up" menu allows you to lock the buttons of the Video TV set. In this way, after this option is selected and the Video TV set is switched off, the buttons on the Video TV only works by using the remote control buttons.

To do that: by using the menu system and after selecting the option, press ▶. Then press ▼ or ▲ to select **On**. Press **OK** to confirm and store and finally press I/⏻.

- *To cancel this function afterwards, select "Off" instead of "On" in the step above.*
- *If you have locked your Video TV and the remote commander is lost, press the I/⏻ button (during more than 5 seconds) on the set to operate it.*

Adjusting The Picture Rotation
(only for KV-21FV1U)

Because of the earth's magnetism, the picture might be slant. In this case, you can correct the pictures slant by using the option "Picture Rotation" in the "Set Up" menu.

To do that: by using the menu system and after selecting the option, press ▶. Then press ▼ or ▲ to correct any slant of the picture between -5 and +5 and finally press **OK** to store.

Switching On The Video TV Automatically (On Timer)

The "On Timer" option in the "Timer" menu allows you to preset your Video TV to automatically switch on at a desired time. You can select the TV programme or video playback to be switched automatically on from standby mode.

To do that: by using the menu system and after selecting the option press ▶,

1. With **Time** option highlighted, press ▶. Press ▼ or ▲ to set the on-time hour then press ▶. Proceed in the same way to set the minutes and press **OK**.
2. With **Source** option highlighted, press ▶. Then press ▼ or ▲ to select the source to be switched on ("**TV**" or "**VCR**"). If you select "TV", press ▶ and then press ▼ or ▲ to select the programme number you want the Video TV turns on. Press **OK**.
3. With **On Timer** option highlighted, press ▶ and then press ▼ or ▲ to select **On**. Press **OK**.
4. Finally press the standby button I/⏻. At the selected time, the Video TV switches on automatically.

- *Any loss of power will cause these settings to be cleared.*
- *By pressing the ON TIMER button on the remote control you can set on/off the On Timer, but it is not possible to change the time and programme settings.*

Switching Off The Video TV Automatically (Sleep Timer)

You can automatically switch the video TV into standby mode after a selected time period.

To do that: Press the **SLEEP** button on the remote control repeatedly to set the time period delay (OFF, 30, 60 or 90 minutes).

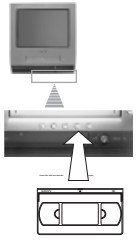
- *While watching the TV, you can press the ⊞/? button on the remote control to display the time remaining.*
- *One minute before the Video TV switches itself into standby mode, a good night message will be displayed on the screen.*
- *To cancel this function afterwards, select "Off" in the step above.*

GB

Playing a tape

1 Insert a cassette with the arrow indication ▲ facing upwards.
•If you insert a cassette with its safety tab removed, playback starts automatically.

2 Press **PLAY** ▶ and the playback starts. On Screen information is displayed for a few seconds.



Additional Tasks

You can operate all the video tasks by using the remote control buttons or the Video TV buttons.

To stop playback

Press **STOP** ■ and the Video TV returns to the normal TV picture.

To stop playback for a moment

Press **PAUSE** ❚❚. Press it again or press to resume playback.

¥ If you leave your Video TV in pause mode, normal playback resumes after about 5 minutes.

To fast forward or rewind the tape

Press **STOP** ■, then press **FF** ▶▶ to fast forward or press **REW** ◀◀.

To view the picture in fast forward or rewind mode

Press and hold **FF** ▶▶ during fast forward or **REW** ◀◀ during rewind. While you hold the button, you can view the picture.

When you release the button, fast forward or rewind mode is resumed.

If you use the buttons on the remote commander, press **FF** ▶▶ or **REW**◀◀ once and will not be necessary to hold the button. In this case to resume normal playback, press **PLAY** ▶.

or

To search a tape at high speed

During playback, press and hold **REW** ◀◀ (rewind) or **FF** ▶▶ (fast forward). A high speed picture appears on the TV screen.

¥ To resume normal playback, release the button.

To eject a cassette

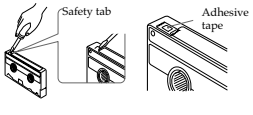
Press **EJECT** ⏏.

¥ You can eject the cassette even if the power is in standby mode.

Protecting your cassette against accidental erasure

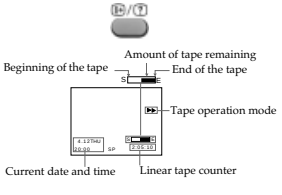
To prevent accidental erasure, break off the safety tab as illustrated.

¥ To record on a cassette without a safety tab, simply cover the tab hole with adhesive tape.



Displaying On-Screen Information

In Play mode, press the ⊡/? button to display the following on-screen information. To show only the amount of remaining tape and the linear tape counter on the screen, press ⊡/? again.
To make the information disappear, press ⊡/? repeatedly until no information is displayed on the screen.



Resetting the tape counter

The tape counter helps you to locate a certain scene after playback.
Press the **COUNTER RESET** button on the remote control to set the counter to "00:00:00" before playing the tape. The tape counter is automatically reset to zero whenever a cassette is inserted. The Video TV keeps counting the length of the tape being played. Note, however, that the tape counter does not count the portions without video signals recorded.

Recording TV programmes

1 In standby mode, press the standby button I/⏻ to turn on the Video TV.

2 Insert a cassette with a safety tab.

3 Press **PROGR +** or **–**, or the number buttons to select the programme number.

4 Press **TAPE SPEED** to select the recording speed: **SP** for Standard Play or **LP** for Long Play.

• In the SP mode, the tape runs twice as fast as the LP mode. It means that in LP mode you can record double time than in SP mode.

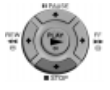
5 Press **REC** ●.

The REC indicator on the front of the Video TV lights up and recording begins.

To stop recording

Press **STOP** ■.

• When the tape reaches the end, the Video TV rewinds the tape automatically to the beginning, then stops. This function does not work when the power of the Video TV is off.

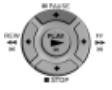


To pause recording

You can cut out an unwanted scene during recording with this button.

1 Press **PAUSE** ❚❚ when an unwanted scene appears on the screen, then recording pauses.
2 Press **PAUSE** ❚❚ again to release the pause mode at the desired scene, then recording resumes from the point set in step 1.

• When the recording pause mode lasts for about 5 minutes, the Video TV stops recording to prevent tape damage.



Continues Recording with the TV off

Whilst you are recording, press I/⏻. The Video TV is turned off. However, recording continues and the REC indicator on the Video TV lights up.

GB

Recording TV programmes using DIAL-TIMER

The Dial-Timer recording function allows you to preset your Video TV to record one programme within a 24 hour period. for setting the Dial-Timer, use DIAL TIMER button on the Video TV.

Before you begin:

- Make sure that the clock is set correctly. If it is not, refer to the "Setting the Clock Manually" section of this instruction manual (see page 7).
- Make sure that the loaded cassette has its safety tab intact.
- Make sure that the Video TV does not enter the timer recording standby mode (the TIMER REC indicator on the Video TV should not be lit).

1 In standby mode, press the standby button I/⏻ to turn on the Video TV.

2 Press **DIAL TIMER**. The "Dial Timer" menu appears on the screen.

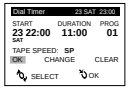
3 Turn **DIAL TIMER** to set the hour of the start time, then press **DIAL TIMER** to confirm.

4 Proceed in the same way as in step 3 to set the minutes of the recording start time, the recording time period and programme number to be recorded.

- *The hour increases or decreases by one hour.*
- *The minutes increase or decrease by one minute.*
- *The recording time period increases or decreases by 15 minutes.*
- *The programme position changes as follows*

0 <—> 1 <—> 2... <—> 99 <—> L1 <—> L 2 <—> 0 <—>1

- *L1 is used for the equipment connected to the Scart connector ⇨1/⇦ placed on the rear of the Video TV.*
- *L2 is used for the equipment connected to the front connectors ⇦ and ⇦ .*



5 With **TAPE SPEED** highlighted, turn the **DIAL TIMER** to select the recording speed: **SP** for Standard Play or **LP** for Long Play, then press the **DIAL TIMER**.

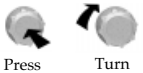
- *In LP mode you can record double time than in SP mode.*

6 Turn **DIAL TIMER** to move the cursor to **OK**, then press **DIAL TIMER** to confirm all the settings.

- *If a warning message appear on the screen, the recording is cancelled and after proceed according the necessities, you must re-enter again the Dial timer settings.*

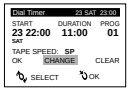
The Dial Timer indicator on the Video TV lights up and the Video TV enters into the timer recording standby mode.

Changing or Cancelling the Dial Timer settings



1 Press **DIAL TIMER**.
The Dial Timer menu appears on the screen.

2 Turn **DIAL TIMER** to **CHANGE** (to change the recording settings) or to **CLEAR** (to clear the recording settings) and press **DIAL TIMER**.



3 **a)** If you have selected **CLEAR**, press **DIAL TIMER** and all the settings will be cleared.
b) If you have selected **CHANGE**, you can change all the settings by following steps from 2 to 5 of the above section "Recording TV Programmes using DIAL TIMER".

Recording TV Programmes Using the Timer

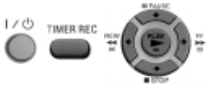
This function allows you to preset your Video TV to record up to 5 programmes within a one-month period.

Before you begin:

- Make sure that the clock is set correctly. if it is not, please refer to the section "Setting the Clock Manually"(see page 7).
- Make sure that the loaded cassette has its safety tab intact.

Setting the Timer

1 In standby mode, press the standby button I/⏻ to turn on the Video TV.



2 Press the **TIMER REC** button to display the Programme List menu.

3 Press 🡻 or 🡹 repeatedly to set the date (for daily and weekly recording, refer to the section "Daily/Weekly Recording" below), then press 🡺 .

4 Proceed in the same way as in step 3 to set recording start time, recording stop time, programme number, tape speed (SP or LP) and VPS/PDC "On" or "Off".

If you have made a mistake during timer setting, press 🡸 to return to the previous position and correct the setting.

- **Date:**
  Daily/Weekly Recording
  You can preset your Video TV to record the same programme every day of the week (daily recording) or the same programme on the same day every week (weekly recording).
  Whilst you are in DATE position, with each press of 🡻, the setting changes as follows:
  23 SAT (today) —> MON-SUN —> MON-SAT —> MON-FRI —> SAT (means every Saturday...) —> FRI —> SUN —> 22 (next month).—>...
- **Time:**
  - *The hour increases or decreases by one hour.*
  - *The minutes increase or decrease by one minute.*
- **Programme number:**
  - The programme position changes as follows:
    0 <—> 1 <—> 2... <—> 99 <—> L1 <—> L 2 <—> 0 <—>1
  - L1 is used for the equipment connected to the Scart connector ⇨1/⇦ placed on the rear of the Video TV.
  - L2 is used for the equipment connected to the front connectors ⇦ and ⇦ .
- **Tape Speed:**
  - In "LP" mode you can record double than in SP mode
- **VPS/PDC:**
  - For details refer to "Timer recording with VPS/PDC signals" section of this instruction manual (see page 14).

5 Press **OK**.

6 If you want to set more programmes, press 🡸 or 🡺 to move the cursor to **ADD** and then press **OK**. Repeat steps from 3 to 5.

7 After setting all your desired programmes press 🡸 or 🡺 and highlighting **OK**, press the **OK** button to confirm your settings.

The TIMER REC indicator on the Video TV lights up and the Video TV enters into timer recording standby mode.

To Stop Timer Recording

Press the **ON/OFF** button on the remote control. Then the TIMER REC indicator on the Video TV turns off.

Using the Video TV before Timer Recording starts

You can watch a TV programme, check the timer settings and reset the counter in timer recording standby mode. However, if you want to eject the cassette, use the tape operation buttons, change or cancel the timer settings, you have to press the **ON/OFF** button on the remote control to turn off the TIMER REC indicator on the Video TV set.

Remember to press again the **ON/OFF** button to make the TIMER REC indicator lights up again and the set comes back into the timer recording standby mode.

GB

Timer recording with VPS/PDC signals

Some broadcasting system transmits VPS (Video Programme System) signals or PDC (Programme Delivery Control) signals with the TV programmes. These signals assure you that your timer recordings are made regardless of broadcast delays, early starts, or broadcast interruptions. For example, if an urgent news bulletin interrupts a regular programme, recording stops. As soon as the interrupted programme resumes, recording starts again. To do that:

1 When you set a programme to be recorded by using the timer, (refer to the "Setting the Timer" section on page 13), set **VPS/PDC** to **On**.

- *If recording times overlap due to a VPS/PDC time shift, the programme that was broadcast first has priority. Recording of the second programme begins when the first programme has finished.*
- *If the Video TV could not receive VPS/PDC signal because it was too weak or because the station failed to transmit VPS/PDC signals, timer recording is made without the VPS/PDC function.*

Recording TV Programmes Using VideoPlus+ *

* *VideoPlus+ is a trademark applied for by Gemstar Development Corp. VideoPlus+ system is manufactured under license from Gemstar Development Corporation.*

The VideoPlus+ function allows you to simplify the task of making timer recordings. Using VideoPlus+, you can make all the necessary settings by just entering the desired programme's 9-digit code, which is available in your local programme guide.

Before you begin:

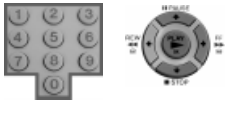
- Make sure that the loaded cassette has its safety tab.

1 In standby mode, press the standby button I/⏻ to turn on the Video TV.

2 Press the **VIDEOPLUS+** button to display the VideoPlus+ menu.

3 Press the number buttons to enter the desired programme's VideoPlus+ number and press **OK**.

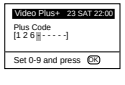
- *If you have made a mistake, press ← and re-enter the correct number.*



4 On the screen appears automatically date and time recording settings. With **PROG** column highlighted, press ↓ or ↑ to select the correct programme number and then press →.

5 Press ↓ or ↑ to select the recording speed: **SP** or **LP**. Then press →.

- *In LP mode you can record double time than in SP mode.*



6 Highlighting the **VPS/PDC** column, press ↓ or ↑ to select **On** or **Off**. (for details, refer to "Timer recording with VPS/PDC signals" section above). Then press →.

7 The Programme List menu appears on the screen. If recording settings are correct, highlighting **OK**, press the **OK** button to confirm.

8 If you want to check, add, change or cancel your settings please refer to the "Checking/Adding/Changing/Cancelling the Timer Settings" section (see page 15).

The TIMER REC indicator on the front of the Video TV lights up and the set enters into timer recording standby mode.

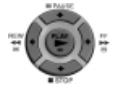
Checking/Adding/Changing/Cancelling the Timer Settings

GB

1 Press the **TIMER REC** button on the remote control to display the list of the timer settings that you preset. If you just want to check the list, go to step 4. If you want to add, change or clear any setting, please follow all the steps below.

2 Press → or ← repeatedly to select **ADD, CHANGE** or **CLEAR** and press **OK**.



3 **a)** To add new settings:
Repeat steps from 3 to 7 of the section "Setting the Timer" (see page 13).

b) To change the settings:
Press ↓ or ↑ repeatedly to move the cursor to the setting you want to change, then press **OK**. Finally repeat steps from 3 to 7 of the section "Setting the Timer" (see page 13).

If you notice you have overlapped timer settings, you can correct the settings as mentioned above. Otherwise, the second programme starts recording only after the first programme has finished.

c) To clear the settings:
Press ↓ or ↑ repeatedly to move the cursor to the setting you want to delete, then press **OK**. The setting is cleared and "--" appears.

4 When you finish adding, changing or cancelling the settings, press ↓ or ↑ to select **OK** and then press the **OK** button.

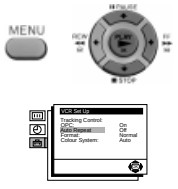
If there are other timer setting on the list, the Video TV enters the timer recording standby mode and the TIMER REC indicator on the Video TV set lights up.

Playing a Tape Repeatedly

The "Auto Repeat " option in the "VCR Set Up" menu allows you to play a recorded tape repeatedly.

To do that: by using the menu system and after selecting the option, press . Then press or to select **On**. Finally press **PLAY** ▶ to start the playback. When the tape reaches its end, the video TV rewinds the tape to the beginning and then, plays it again.

• *To cancel this function afterwards, select "Off" instead of "On" in the step above.*



Searching Using the Index Function

The Video TV marks the tape with an index signal at the point where each recording begins. These signals can be used to find a specific recording. this Video TV can search up to 99 index signals ahead of or behind the current position.

To do that:

1 Insert a tape.

2 Press **INDEX** ⏮ or ⏭ repeatedly to specify how many index signals ahead or behind you want to search in relation to the current tape position. The Video TV begins searching for the selected index. When the index is reached, playback begins automatically.

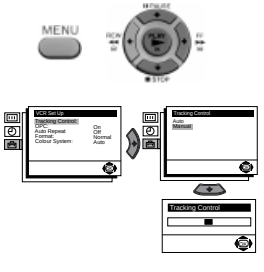
• *You can stop searching by pressing STOP* ■.

Adjusting the Tracking

The tracking condition is automatically adjusted on this Video TV. The AUTO TRACKING message appears while the Video TV is searching for the best tracking condition.
However, if streak or snow noise appear on the video playback, you can adjust the tracking condition manually by using the "Tracking Control" menu in the "VCR Set Up" menu.

To do that: Whilst you are in play mode and by using the menu system, select the **Tracking Control** menu and press . Press or to select **Manual** and press . When the tracking meter appears on the screen press or to reduce the picture noise and get the best picture noise. Finally press **OK**.

• *To cancel this function afterwards, select again "Auto" instead of "Manual" in the step above.*



Adjusting the Picture with the Optimum Picture Control (OPC)

The "OPC" option in the "VCR Set Up" menu allows you to improve playback and recording quality by adjusting the system parameter automatically according to the condition of the video tape. The OPC function works on all types of tapes, even on rental tapes. This function is set to "On" at the factory. To maintain better picture quality, we recommend to leave the function on.

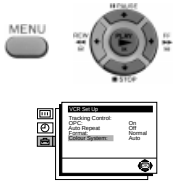
To do that: Whilst you are in play mode and by using the menu system, select the **OPC** option and press . Then press or to select **On** or **Off**. Finally press **OK**.

Setting the Colour System

The colour system is set in "Auto" condition. However, by using the "Colour System Option" in the "VCR Set Up" menu allows you to, set the colour system to the corresponding system that the tape was recorded in the case that you notice streaks appearing on the screen during playback

To do that: Whilst you are in play mode and by using the menu system, select the **Colour System** option and press . Then press or to select the corresponding colour system (**Auto, MESECAM, PAL** or **NTSC**). Finally, press **OK**.

• *To cancel this function afterwards, select again "Auto" in the step above.*

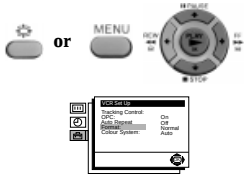


Viewing Programmes in 16:9 Mode

When viewing recording of programmes which were originally broadcast in 16:9 mode, you can set your Video TV to 16:9 mode to prevent a distorted picture.

To do that: : Press repeatedly the button on the remote control to select 16:9 or Normal (4:3 format). You can also do it, by using the menu system. In that case, select the **Format** option in the "VCR Set Up" menu and press . Then press or to select **16:9** or **Normal**. Finally, press **OK**.

• *When you change channels, switch between input sources or turn the power on and off, the Video TV will switch back to normal mode.*



GB

When Connecting to a Sony VCR

If you use this Video TV with another Sony VCR, the remote control may accidentally operate both the Video TV and VCR at the same time. The **VHS** option in the "Set Up" menu allows you that the remote control operates only this Video TV.

To do that: by using the menu system and after selecting the **VHS** option, press . Then press or to select **Sony**. Finally, press **OK**.

• *To cancel this function afterwards, select "Others" in the step above.*

Teletext

Teletext is an information service transmitted by most TV stations. The index page of the teletext service (usually page 100) gives you information on how to use the service. To operate teletext, use the remote control buttons as indicated below.

Make sure to use a channel (TV Broadcast) with a strong signal, otherwise teletext errors may occur.

To Switch On Teletext:
After select the channel (TV Broadcast) which carries the teletext you wish to view, press ☰.

To Select a Teletext page:
Input 3 digits for the page number, using the numbered buttons.
- *If you have made a mistake, retype the correct page number.*
- *If the counter on the screen continues searching, it is because this page is not available. In that case, input another page number.*

To access the next or preceding page:
Press PROGR + (▲) o PROGR - (▼).

To superimpose teletext on to the TV:
Whilst you are viewing teletext, press ☰. Press it again to cancel teletext mode.

To freeze a teletext page:
Some teletext pages have sub-pages which follow on automatically. To stop them, press ⏪ / ⏩.
Press it again to cancel the freeze.

To reveal concealed information (e.g: answer to a quiz):
Press ⏩ / ❓. Press it again to conceal the information.

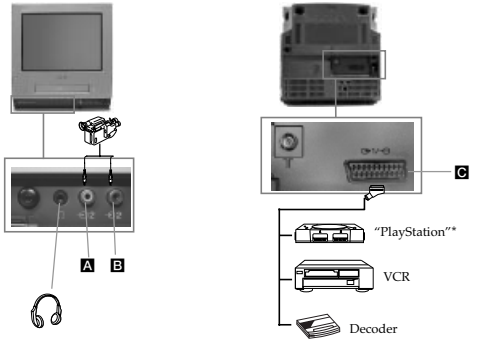
To Switch Off Teletext:
Press ▢.

Fastext

Fastext service lets you access pages with one button push.
While you are in Teletext mode and Fastext is broadcast, a colour coded menu appears at the bottom of the teletext page. Press the colour button (red, green, yellow or blue) to access the corresponding page.

Connecting Optional Equipment

Using the following instructions, you can connect a wide range of optional equipment to your Video TV set. (Connecting cables are not supplied).



* "**PlayStation**" is a product of Sony Computer Entertainment, Inc.

GB

Using Optional Equipment

In order to get the input signal of a connected equipment onto the TV screen, you need to select the symbol of the connector to which you have connected the device.
e.g.: You have connected a "PlayStation" to the connector with the symbol ⇨1 / ⇢. Press the button ⇨ on the remote control repeatedly until you see the symbol ⇨1 on the screen.

1 Connect your equipment to the designated Video TV socket, as indicated above.

2 To watch the picture of the connected equipment, press the ⇨ button repeatedly until the correct input symbol appears on the screen.

Symbol	Input Signals
⇨1	• Audio / video input signal through the Scart connector **C**.
⇢	• RGB input signal through the Scart connector **C**.
⇨2	• Video and audio input signals through the phono sockets **A** and **B**.

3 Switch on the connected equipment.

4 Press ▢ button on the remote control to return to the normal TV picture.

Editing with another VCR

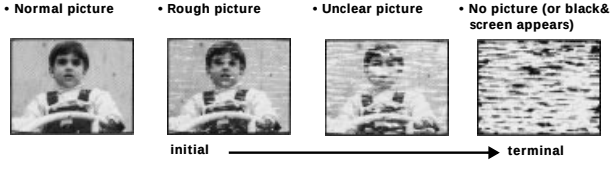
Using an additional VCR and connecting as it is in the section above "Connecting Optional Equipment", you can edit a tape.

Video Head Cleaning

Even the Auto Head Cleaner built into this set automatically cleans the video heads when a cassette is loaded or unloaded. However, if the playback pictures are noisy and hardly visible or no picture appears, video heads probably need an extra cleaning. In this case, clean the video heads using the V-25CL video head cleaning tape (not supplied) or ask Sony service personnel to clean the video heads.

Do not use a commercially available wet-type cleaning tape, as it may damage the video heads.

Symptoms caused by contaminated video heads



Worn Video heads

If your Video TV displays a poor picture after you clean the video heads, you may need to replace them. Consult your dealer or the Sony Service Centre nearest you.

Check the video heads after 1,000 hours of use

A Video TV is a high precision machine. It must record on or play from magnetic tapes on which the image signals from the colour TV or the video camcorder are recorded.
The video heads or mechanical parts for transporting the tape are contaminated or worn after extended use. You should have your Video TV checked after each 1,000 hours of use.

Troubleshooting

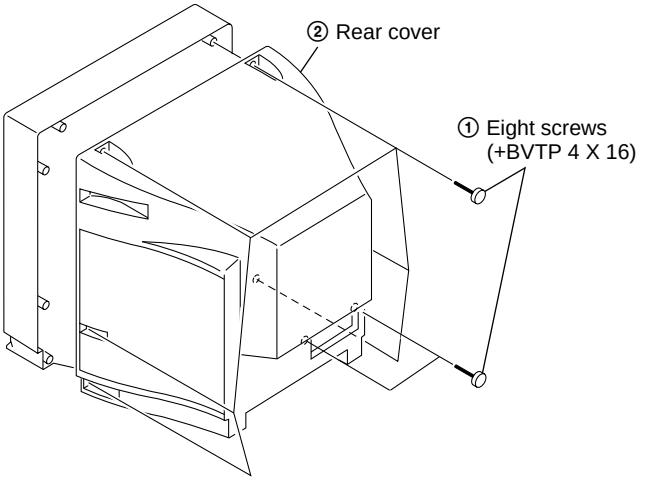
If you have any problems while viewing your Video TV, please check the following troubleshooting guide. If the problem persists, contact your Sony dealer.

Problem	Solution
TV Section	
No picture (screen is dark) and no sound.	• Check the aerial connection. • Plug the Video TV in and press the ⏻ button on the front of TV or if the standby indicator ⏻ is on, press I/⏻ button.
Poor or no picture (screen is dark), but good sound.	• Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to the factory settings.
No picture when watching equipment connected to the Scart connector.	• Check that the optional equipment is on and press the ⏎ button repeatedly on the remote control until the correct input symbol is displayed on the screen.
Good picture, no sound.	• Press the ◿ +/- button on the remote control.
No colour on colour programmes.	• Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to factory settings.
Distorted picture when changing programmes or selecting teletext.	• Turn off any equipment connected to the Scart connector on the rear of the TV.
Picture slanted (only for KV-21FV1U).	• Using the menu system, select the "Picture Rotation" option in the "Set Up" menu to correct the picture slant.
Noisy picture when viewing a TV channel.	• Using the menu system, select the "Manual Programme Preset" menu and adjust Fine Tuning (AFT) to obtain better picture reception.
Clock section	
The clock has stopped and "--:--" is displayed.	• Reset the clock and timer settings. for details refer to the section "Setting the Clock Manually" (see page 7).
Playback section	
Power is on, but the tape does not run.	• Switch off, disconnect the AC power cord and leave the set for about one minute.
Poor playback picture.	• Using the menu system, select the "VCR Set Up" menu and check the "Colour System" option. • Adjust the tracking manually. For details refer to the section "Adjusting the Tracking" (see page 16). • Clean the video heads. For details refer to the section "Video Head Cleaning" (see page 20). • Use a new tape.
The sound drops out.	• Use a new tape.
Recording section	
The cassette is ejected when you press REC ●.	• Cover the safety tab hole. For details refer to the section " "Protecting your cassette against accidental erasure" (see page 10).
Cannot record.	• Insert a cassette with its safety tab intact. • Rewind the tape.
Timer recording section	
Cannot program a recording using the timer.	• Set the current time and date. For details refer to the section "Setting Clock Manually" (see page 7).
The cassette is ejected when you press TIMER REC ON/OFF.	• Cover the safety tab hole. For details refer to the section " "Protecting your cassette against accidental erasure" (see page 10).
The TIMER REC indicator on the front of the Video TV does not light up even though you press TIMER REC ON/OFF.	• Insert a cassette with its safety tab intact. • Rewind the tape. • Check the settings for timer recording. For details refer to the section "Checking/Adding/Changing/Cancelling the Timer Settings" (see page 15).
Others	
A cassette cannot be inserted.	• Press EJECT ⏏ to eject the cassette that it is already inserted.
Remote control does not function.	• Replace the batteries.
The standby indicator I/⏻ on the Video TV flashes.	• Contact to your nearest Sony service centre.

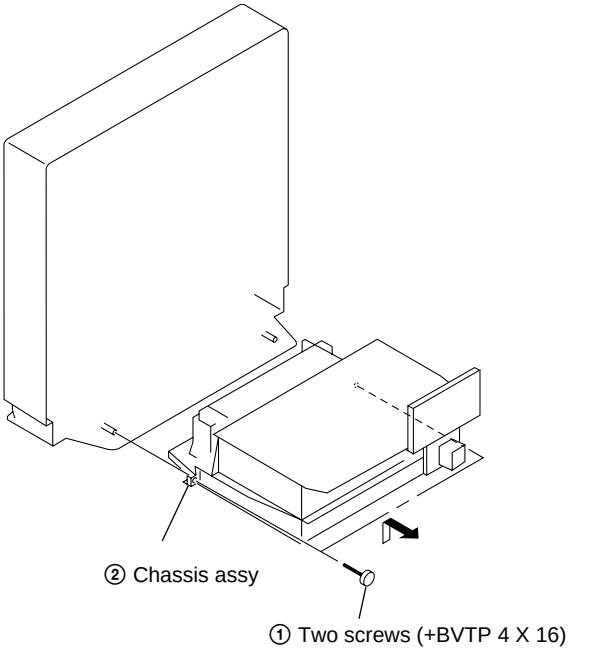
In case of problems, have your TV serviced by qualified personnel. Never open the casing yourself.

SECTION 2
DISASSEMBLY

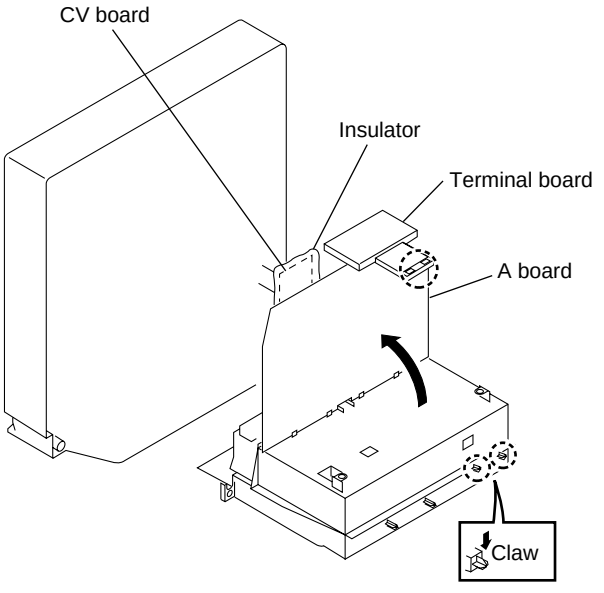
2-1. REAR COVER REMOVAL



2-2. CHASSIS ASSY REMOVAL

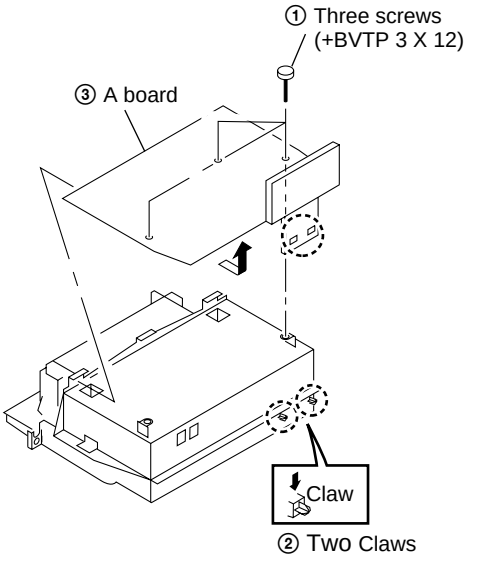


2-3. SERVICE POSITION (A BOARD)

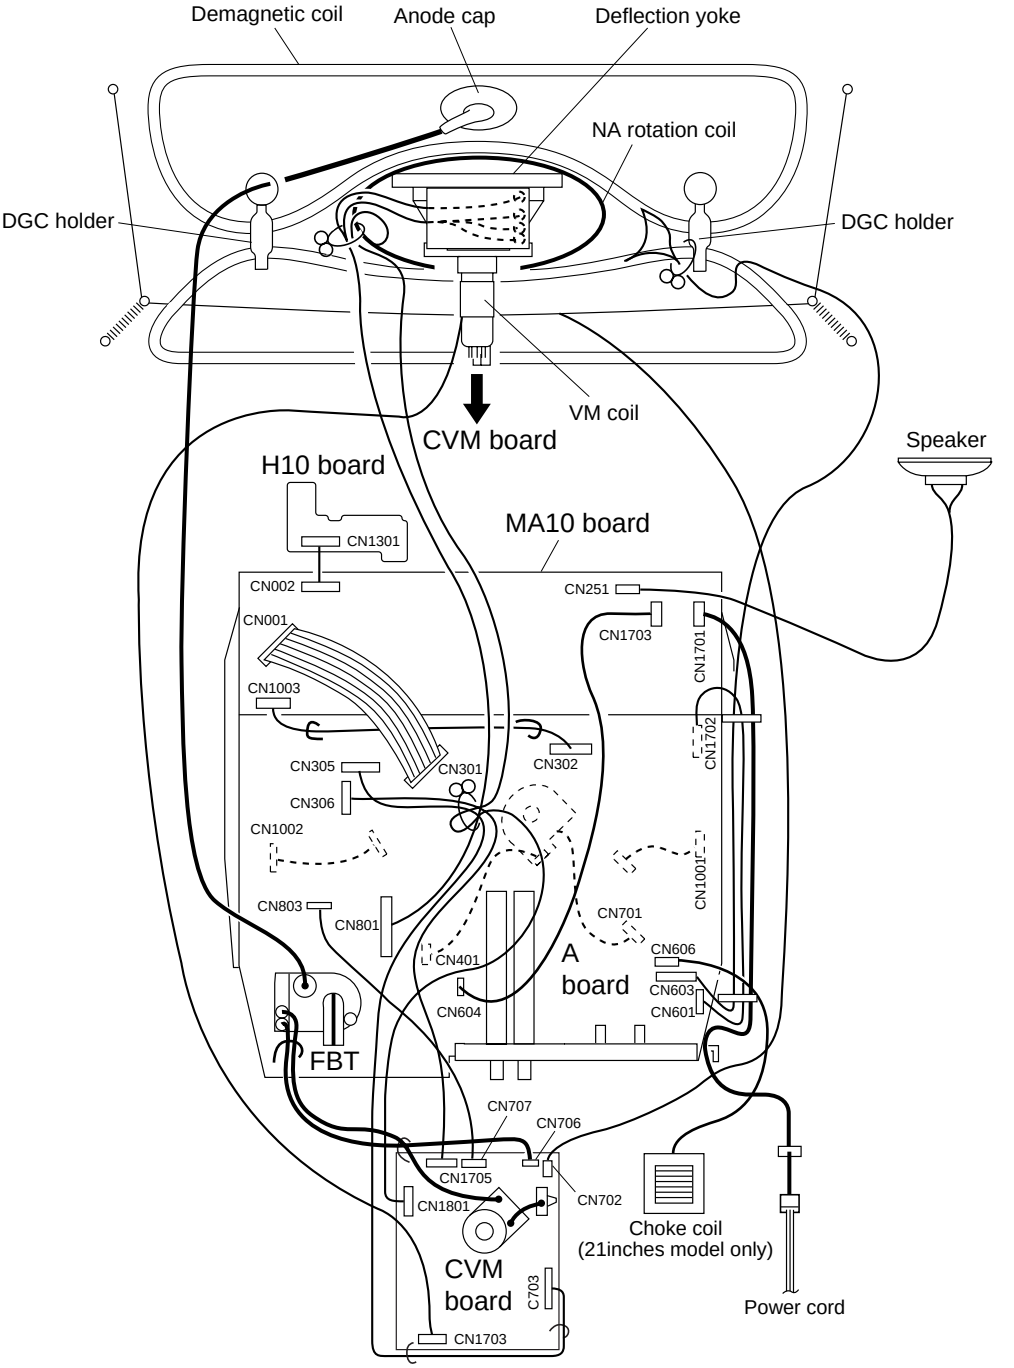


Note: Open the A board after slide the terminal board

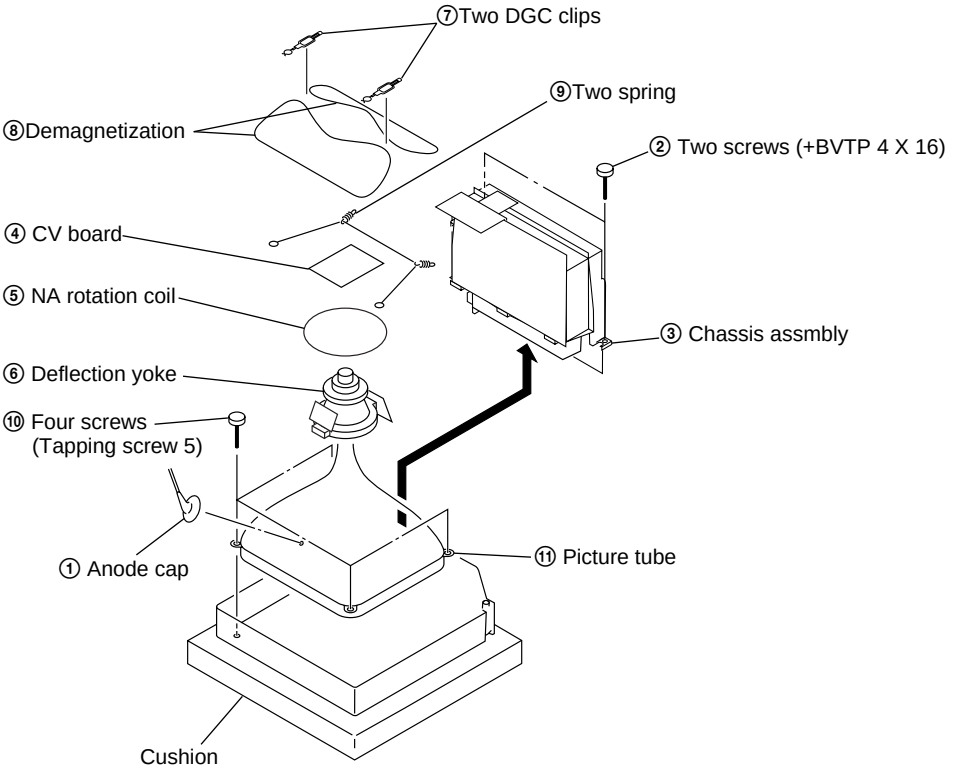
2-4. A BOARD REMOVAL



2-5. HARNESS LOCATION



2-6. PICTURE TUBE REMOVAL

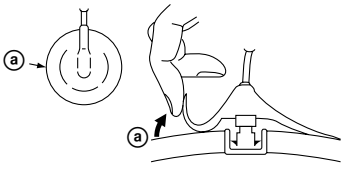


- **Removal of anode-cap**

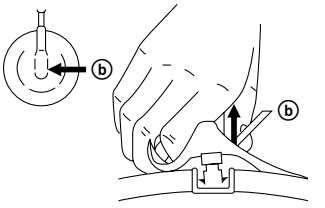
NOTE : Short circuit the anode of the picture tube and the anode cap to the metal chassis, CRT shield or carbon paint on the CRT, after removing the anode.

- **removing procedures**

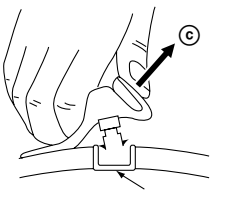
① Turn up one side of the rubber cap in the direction indicated by the arrow ⓐ.



② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow ⓑ.

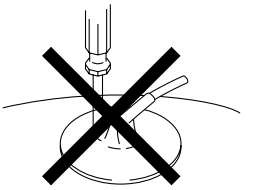


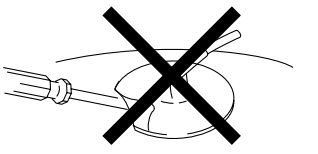
③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling it up in the direction of the arrow ⓒ.



- **how to handle an anode-cap**

① Don't hurt the surface of anode-caps with shaped objects!
② Don't press the rubber too hard so as not to hurt inside of anode-caps!
A metal fitting called the shatter-hook terminal is built into the rebber.
③ Don't turn the foot of rubber over too hard!
The shatter-hook terminal will stick out of damage the rubber.





SECTION 3
SET-UP ADJUSTMENTS

- The following adjustments should be made when a complete realignment is required or a new picture tube is installed.
- These adjustments should be performed with the rated power supply voltage, unless otherwise noted.

The PICTURE and Brightness controls should be set as follows unless otherwise noted:

CONTRAST ..... 100% (LIVE)
BRIGHTNESS control 50%
COLOUR 50%
HUE 50%
SHARPNESS 50%

Perform the adjustments in the following order:

1. Beam Landing
2. Convergence
3. Focus
4. Screen (G2)
5. White Balance
6. Picture Distortion

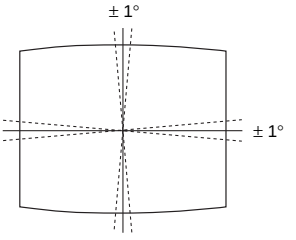
Note: Test Equipment Required.
1. Color bar/Pattern Generator
2. Degausser
3. Oscilloscope

Preparation:

- In order to reduce the influence of external magnetic forces on the picture tube, face the TV set in an easterly or westerly direction.
- Turn the power switch for the unit ON and erase the magnetic force using a degausser.

3-1. BEAM LANDING

1. Degauss CRT screen.
2. Inut all-green pattern.
3. Adjust roughly landing at the centre of the screen by moving the purity magnet.
4. Adjust toughly landing at both right and left sides of the screen by sliding the DY forward or backward.
5. Adjust landing according to the lupe method or the allowance mothod.
6. Adjust DY so the horizontal tilt of DY is within the standard. Product standard is as follows.



7. Use disk magnet, if landing at the corner is not good. Disk mg shold be applyied on the funnel. Don't use mag if possible because of picture distortion.
8. Screw down the DY.

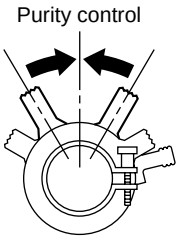


Fig.3-1

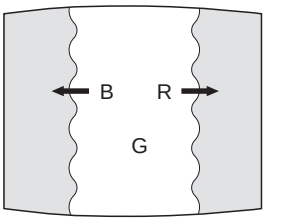

Fig.3-2

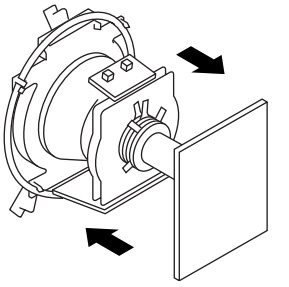

Fig.3-3

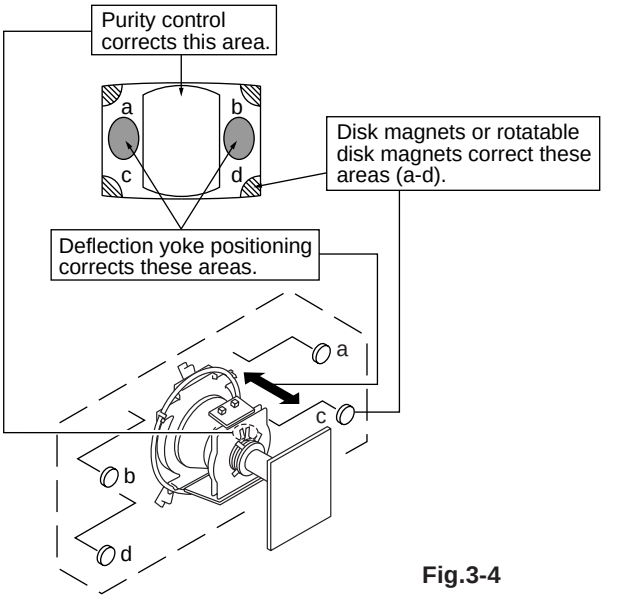

Fig.3-4

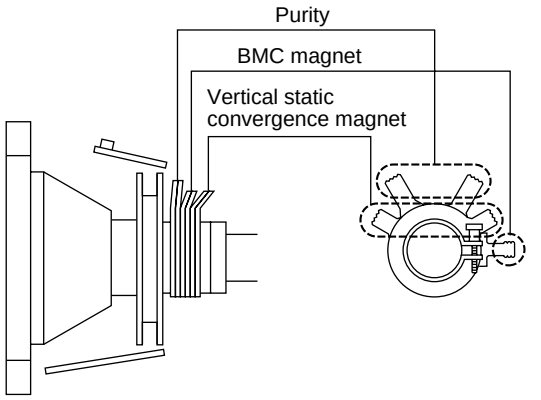
3-2. CONVERGENCE



(1) Horizontal and Vertical Static Convergence

1. Receive the channel with dot signal.
2. Minimize BRT and set picture level to the position where the dot is easy to see.
3. Adjust horizontal convergence at the centre of the screen with V. STAT correction piece.
4. Adjust vertical convergence of dot at the centre of the screen with V. STAT MG.
5. Adjust repeatedly static convergence according to righe figure in case that both HMC and VMC are not independant.
   In case of both HMC and VMC exist attach BMC magnet to neck assembly.
   Case of HMC attached
   Turn BMC over in case of adjustment in opposite direction.
   Use BMC mg only when it is necessary, for it makes CRT focus worse.

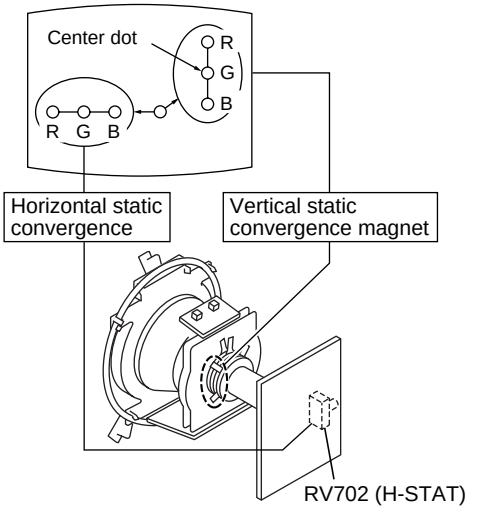


Fig.3-5

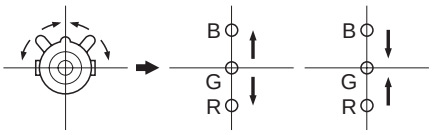
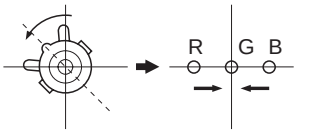
- **Movement of red, green and blue dots by V. STAT tilting and opening or closing.**

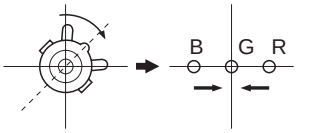
① Movement of opening or closing the V. STAT convergence magnet.



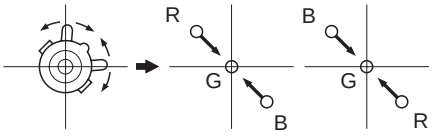
② Movement of tilting the V. STAT convergence magnet counterclockwise.



③ Movement of tilting the V. STAT convergence magnet clockwise.

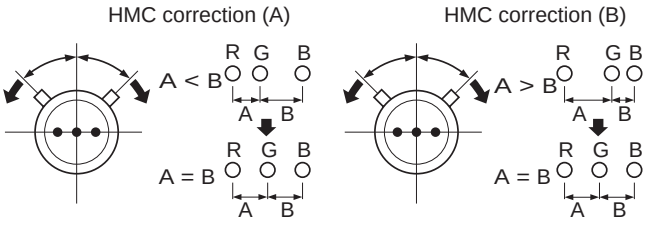


④ Movement of tilting and opening or closing the V. STAT convergence magnet.

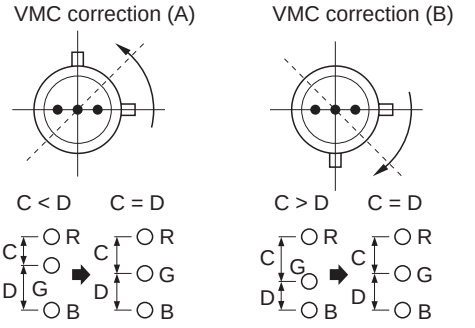


- **If the blue dot did not harmonize with red and green, then use the BMC magnet to adjust.**

1)HMC (Horizontal mis-convergence) correction



2)VMC (Vertical mis-convergence) correction.



(2) Convergence adjustment of screen surroundings.

(Dynamic convergence)

1. Recieve dot pattern.
2. Set BRT to main and PIC to the level where dot pattern is easy to see.
3. Shake DY up and down. Insert DY spacer at position 'A' so that cross MIS convergence is minimum.
4. Shake DY right or left and insert DY spacer at position 'C' and 'D' where tilt is the smallest both on vertical and horizontal axis.

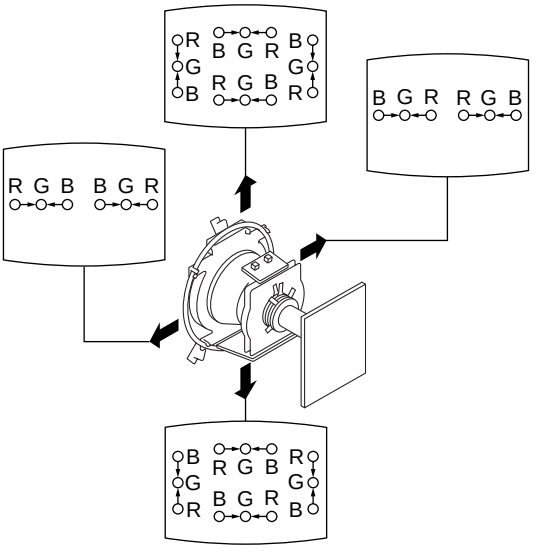


Fig.3-6

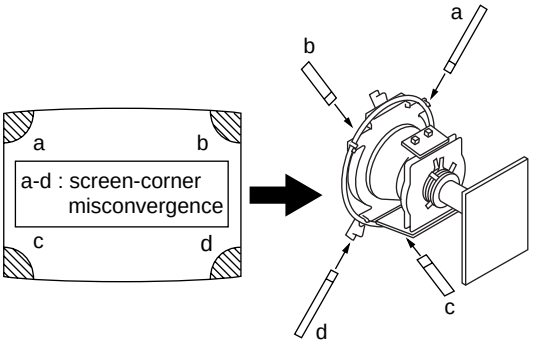

Fig.3-7

3-3. FOCUS ADJUSTMENT

1. Receive monoscope pattern.
2. Adjust FBT focus VR so that the picture has the best focus.
   Adjust the focus so that the center of the screen is in the best focus.
   Turn focus VR clockwise to the end and then turn back counter clockwise.
   While turning back, pay attention to the centre cross of the colour pattern, and then adjust the VR so that horizontal line because clear and vertical line begins to become unclear.
   Change signal to dot pattern, confirm that corner focus is good.
3. Receiving white signal, confirm that magenta ring is hardly noticed.

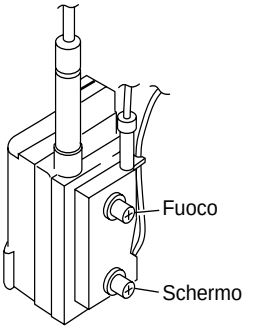

Fig.3-8

3-4. SCREEN (G2) ADJUSTMENT

1. Receive a Black signal, Cross and Hatch signal or dots signal.
2. Make sure to be in Personal, reset condition.
3. Adjust screen VR on FBT so that highest level of black area among kathodes is 175 ± 2 V.

3-5. WHITE BALANCE ADJUSTMENT

1. Input ehite pattern. Adjust white balance of drive side, using service mode VP No. 22 RAMP, No. 23 GAMP and No. 24 BAMP, so that colour temperature is 8600 K + 0 MPCD.
2. Input gray pattern for 10NIT. Adjust white balance of cut-off side, using service mode No. 25 RCUT, No. 26 GCUT and No. 27 BCUT, so that colour temperature is 8600 K + 0 MPCD.
3. To take tracking, confirm again that colour temperatures of both side are within the limit of the above standard 8600 K + 0 MPCD. If necessary, re-adjust.
   W/B Specification:
   H/L difference = 2JND or less
   C/O difference = 3JND or less

3-6. PICTURE DISTORTION ADJUSTMENT

- When performing these adjustment, do receive monoscope signal.

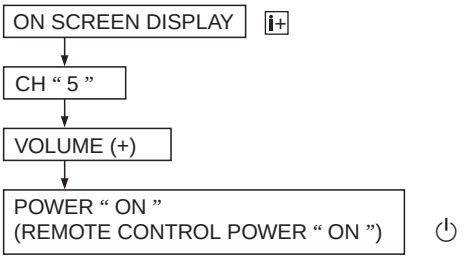
SECTION 4
CIRCUIT ADJUSTMENTS

4-1. ADJUSTMENTS WITH COMMANDER

1. ENTERING SERVICE MODE

1) Turn on the main power of the set and enter into stand-by mode.
2) Press the following sequence of buttons on the Remote Control Commander.



2. TO READ THE MEMORY

1) Set to service mode.
2) When push these buttons [7] → [0] on the remote commander, it would read all item's adjustment value and switch set-up value which written in the memory.

Note: Do not read before "standard value" writing when exchange the MEMORY IC002.

3. PICTURE ADJUSTMENT

1) Select adjustment item number of service mode by [1] and [4] buttons on the remote commander.
2) Adjust [3] and [6] buttons to satisfy set-up value and picture condition of the screen.

4. WRITE TO THE MEMORY

- After adjusted, write to the MEMORY by [MUTE] and [0] buttons and push [0] button while green "light" word indicated on the picture display (about 3 seconds). It takes about 1 second to complete the writing to the MEMORY. When red "light" displayed turns to "G" and that makes writing completely finish.

Color of the screen displayed light word.

[MUTE] button on ..... Green word
[0] button on ..... Red word

5. RELEASE THE SERVICE MODE

- Turn off TV set and turn on again or turn off by the remote commander, and turn off by the remote commander again by stand-by state to disappear serivce display and set to normal TV mode.

6. WRITING "STANDARD VALUE"

1) Set to service mode.
2) When push [5] button on the remote commander green colored "INITIAL write" indicates on the screen right above. Continuing to press [0] button while words are displaying (about 3 seconds). Display turns to red colored "INITIAL write" then the screen become pitch-dark and select 1ch about 5 seconds after. Then it turns green colored "G" display.

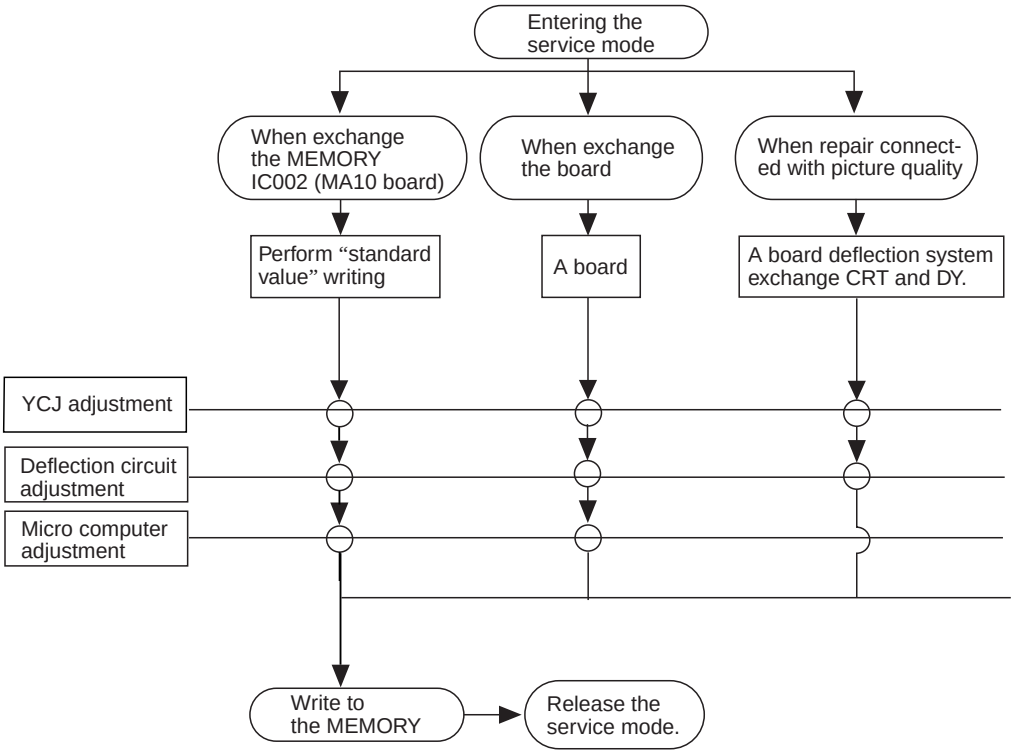
   Perform writing "standard value" standard data in micro computer will write to the MEMORY and set to initialization state all.

Note: When exchange only MEMORY IC002, perform "standard value" writing in the begginning.

4-2. ADJUSTMENT METHOD

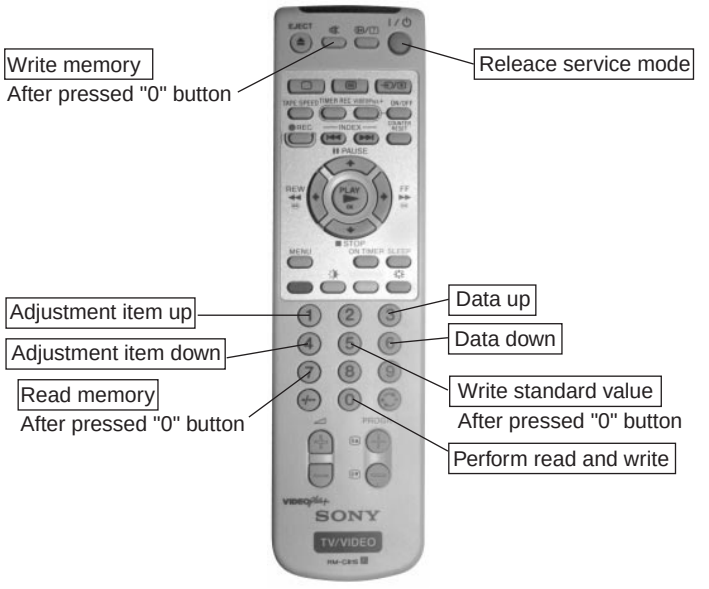
Service adjustment to this model can be performed with the supplied Remote Control Commander RM-955, 956.

- **HOW TO ENTER INTO SERVICE MODE**



Note : • Write to the MEMORY every performing one item adjustment.
• Before writing to the MEMORY adjusted data would not memorize when turn off.

- **REMOTE COMMANDER'S FUNCTION IN SERVICE MODE**



- **SERVICE MODE DISPLAY**

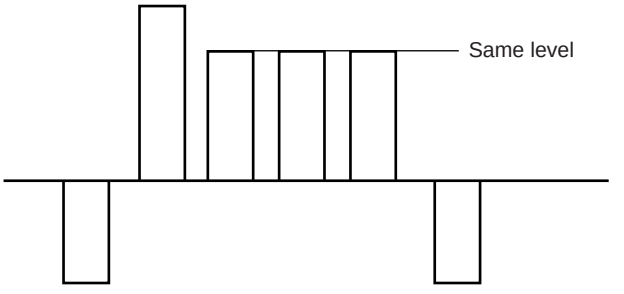
4-4. A BOARD ADJUSTMENT

1. SUB COLOUR ADJUSTMENT

1) Recieve the PAL colour bar signal.
2) Check the pin④ of CN305 by oscilloscope.
3) Adjust the part of the right waveform to become the same level by service mode (VP28:Sub colour).



B-Out waveform

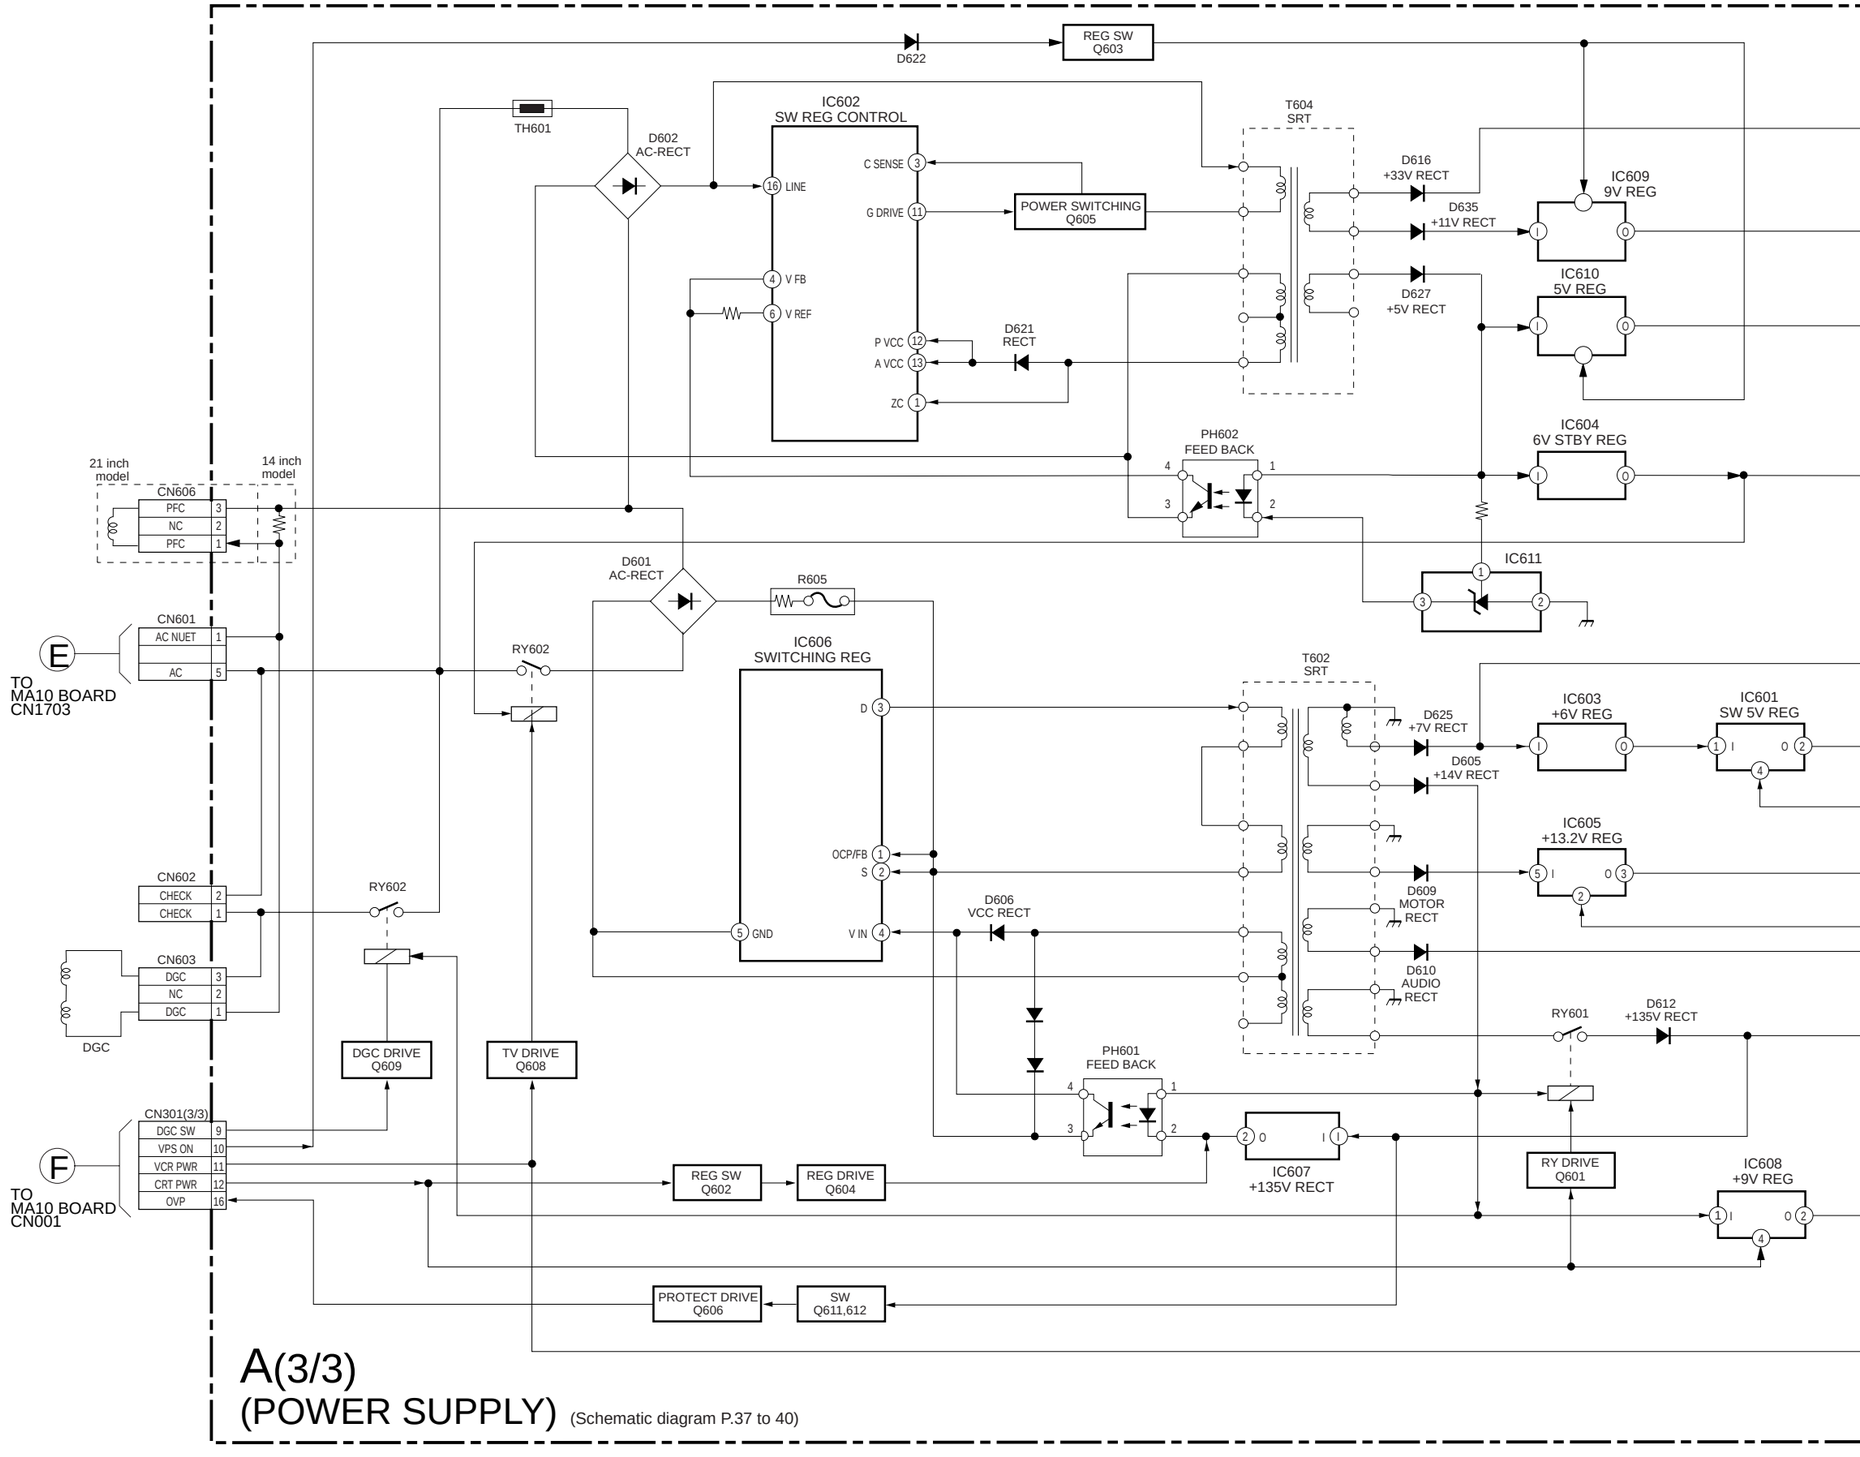
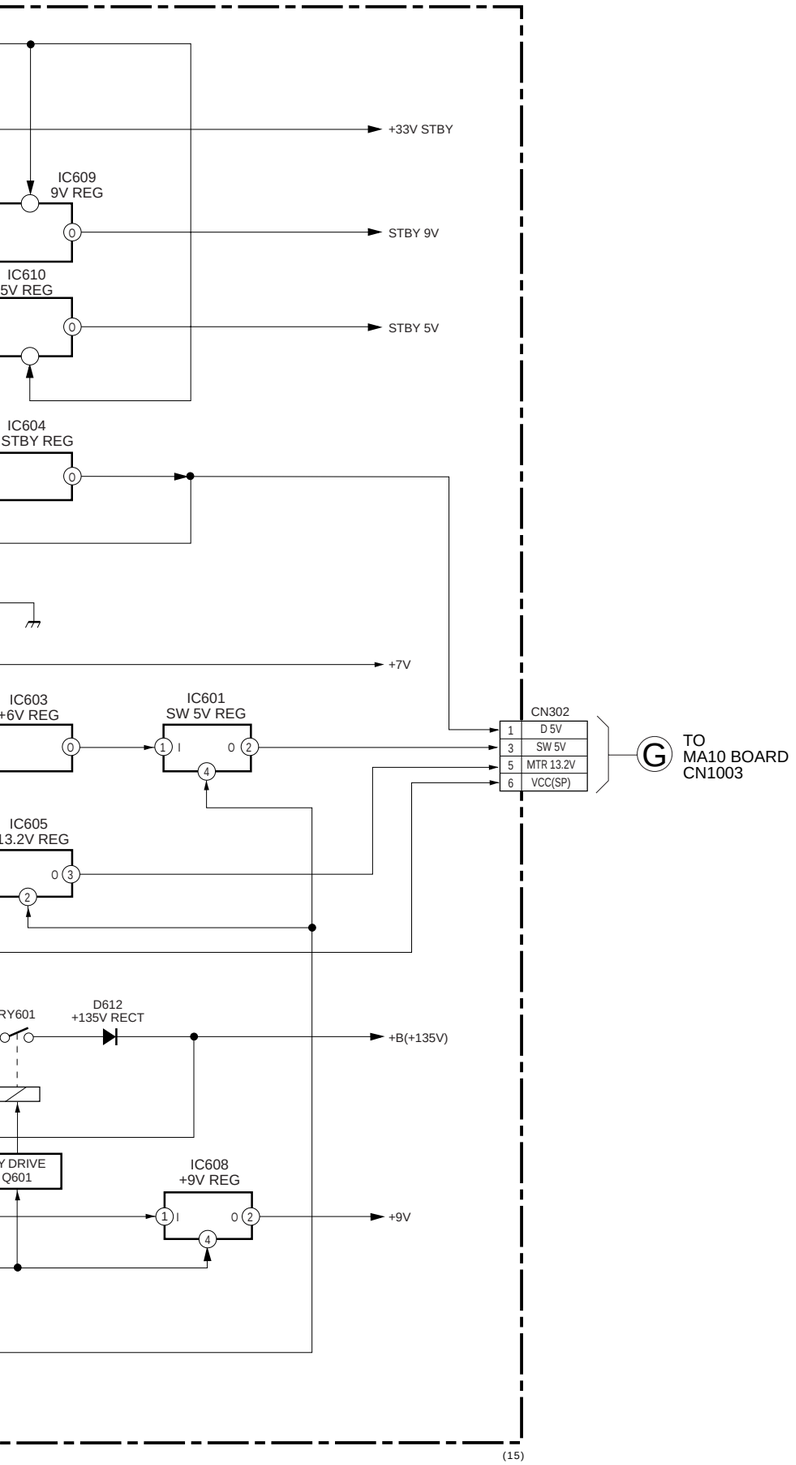
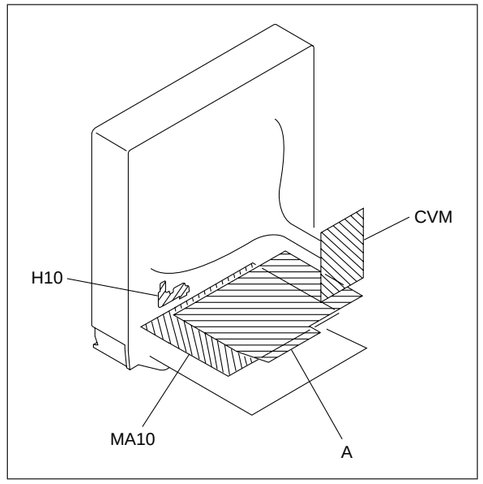
(15)



A(3/3)
(POWER SUPPLY) (Schematic diagram P.37 to 40)



5-2. CIRCUIT BOARDS LOCATION



5-3. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

Note:

- All capacitors are in µF unless otherwise noted. pF: µµF
  Capacitors without voltage indication are all 50V.
- All resistors are in ohms.
  k = 1000 , M = 1000k
- Indication of resistance, which does not have one for rating electrical power, is as follows.

  Pitch: 5 mm
  Rating electrical power: 1/4W(CHIP:1/10W)

- : nonflammable resistor.
- : fusible resistor.
- △ : internal component.
- : panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- : earth-chassis.

- Readings are taken with a color-bar signal input.
- Readings are taken with a 10M digital multimeter.
- Voltage variations may be noted due to normal production tolerances.
- All voltages are in V.
- Circled numbers are waveform reference.
- : B + line
- : B – line.
- : signal path.

∗: Refer to Terminal name of semiconductors in silk screen printed circuit (see page 33).

NOTE:
The circuit indicated as left contains high voltage of over 600 Vp-p. Care must be paid to prevent an electric shock in inspection or repairing.

NOTE:
The circuit indicated as left contains high voltage of over 600 Vp-p. Care must be paid to prevent an electric shock in inspection or repairing.

SECTION 3
CIRCUIT ADJUSTMENTS

Necessary items and indications for total adjustment of electric circuit of this unit will be described in this chapter.

[INSTRUMENTS TO BE USED]

1) Color TV
2) Signal or dual trace type oscilloscope, band more than 30 MHz, delay, as provided.
3) Frequency counter (4 digits or more)
4) PAL pattern generater
5) Digital voltmeter
6) Audio level meter
7) Audio generator
8) Attenuator
9) Distortion meter
10) Alignment tape
    Part code : H7099052H (MH-2)

[CONNECTION]

Unless otherwise specified, connect and adjust the measurement equipment as follows.

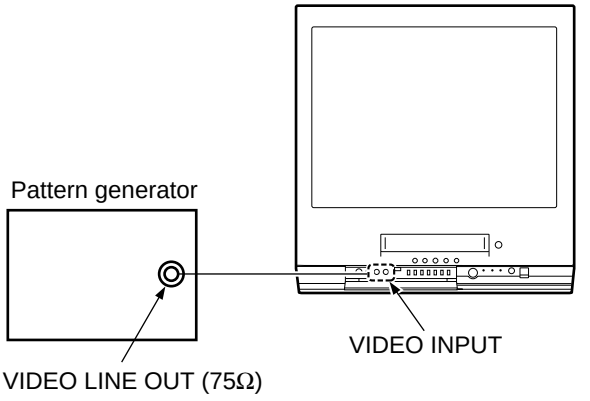

Fig.3-1

[SET-UP FOR ADJUSTMENT]

The video signal from the pattern generator is used as adjustment signal for electrical adjustment. This video signal should meet the requirement. Connect the oscilloscpe to the video input terminal on the MF 1 board and make sure that the amplitudes of sync signal of video signal, video portion and burst signal are flat at approximately 0.3, 0.7 and 0.3 V, respectively, and that the level ratio of the burst signal and “red siganl” are 0.30 : 0.66, Fig.3-2 shows video signals (color bars) used in adjusting the electrical adjustment.

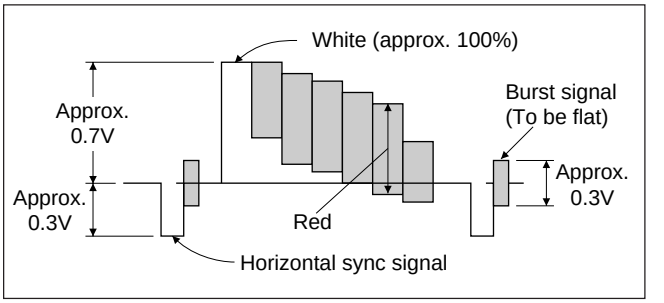

Fig.3-2

Alignment Tape (MH-2)

	Time	Video signal	Audio signal
1	10 minutes	Starir-step	6kHz
2	5 minutes	-	3kHz
3	10 minutes	Color bar	1kHz
4	3 minutes	RF sweep	-

[SPECIFIED INPUT/OUTPUT LEVEL IMPEDANCE]

Input/Output terminal

Video input	Pin jack
	Input signal : 1Vp-p, 75 , unbalanced
	Sync negative
AUDIO LINE IN	Pin jack
	Input level : -7.5dBs
	(0dBs=0.775Vrms)
	Input impedance : More than 47k

X'tal OSC CHECK

Mode	PB
Signal	Alignment tape, Stair step
Measurement Point	MA10 board IC802 ⑤⑨pin(PAL)
Measurement Equipment	Oscilloscope
Specified Value	500±200mVp-p

Check: 1)Confirm the frequency is 4.433619MHz±100Hz(PAL).
2)Confirm the waveform amplitude is 500±200mVp-p.

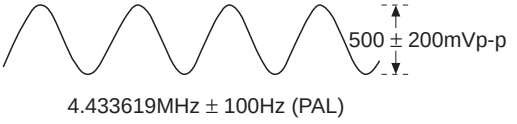

Fig.3-3

CARRIER DEVIATION CHECK

Mode	E-E
Signal	Color bar
Measurement Point	MA10 board IC802 ⑱pin
Measurement Equipment	Spectrum Analyzer
Specified Value	f_2-f_1=1.00±0.08MHz

Check: Confirm f_2-f_1=1.00±0.08MHz
Confirm f_1=3.80±0.13MHz(PAL)

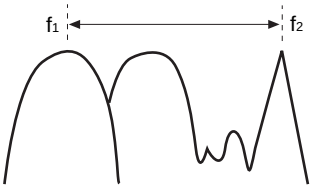

Fig.3-5

SYNC AGC CHECK

Mode	E-E
Signal	Color bar
Measurement Point	MA10 board Q830 emitter
Measurement Equipment	Oscilloscope
Specified Value	1.0±0.1Vp-p

Check: Confirm the waveform amplitude is 1.0±0.1Vp-p.

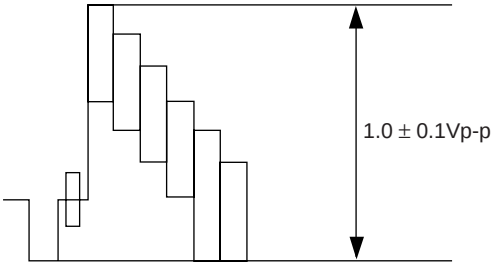

Fig.3-4

WHITE/DARK CLIP CHECK

Mode	E-E
Signal	Color bar
Measurement Point	MA10 board IC802 ㊲pin
Measurement Equipment	Oscilloscope
Specified Value	190±20%(White), 55±20%(Dark)

Preparation: Add 3.3k r esistor between IC802 ㊷pin and GND.

Check: Taking the height from sync to white level as 100%, check white clip and dark clip.

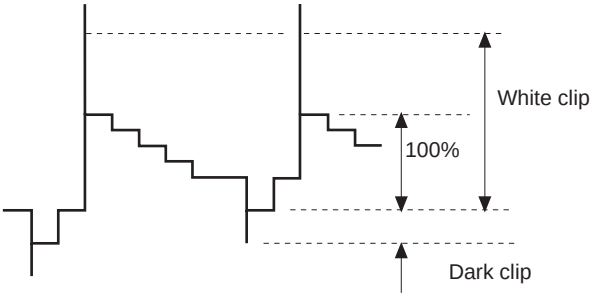

Fig.3-6

REC Y LEVEL CHECK

Mode	E-E(SP)
Signal	No signal
Measurement Point	MA10 board IC802 ⑱pin
Measurement Equipment	Oscilloscope
Specified Value	260±70mVp-p(PAL)

Check: Confirm the Vp-p of the waveform is 220±70mVp-p.

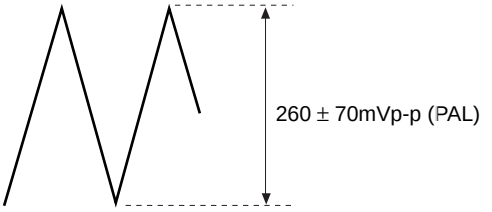

Fig.3-7

PB Y LEVEL CHECK

Mode	PB
Signal	Color bar
Measurement Point	MA10 board Q830 emitter
Measurement Equipment	Oscilloscope
Specified Value	1.0±0.1Vp-p

Check: Confirm the Vp-p of the waneform is 1.0±0.1Vp-p.

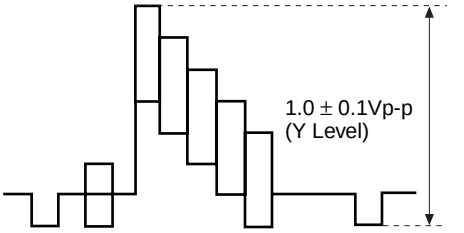

Fig.3-9

REC CHROMA CHECK

Mode	REC(SP)
Signal	Color bar
Measurement Point	MA10 board IC802 ⑭pin
Measurement Equipment	Oscilloscope
Specified Value	350±60mVp-p(PAL)

Check: Confirm the Vp-p of the waveform is 350±60mVp-p.

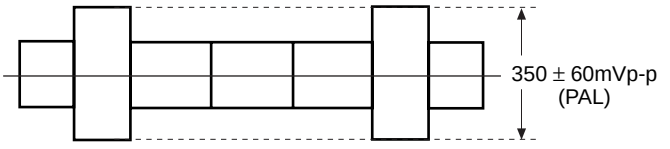

Fig.3-8

HALF H SHIFT CHECK

Mode	EE
Signal	No signal
Measurement Point	MA10 board IC802 ⑱pin
Measurement Equipment	Spectrum Analyzer
Specified Value	8.2±2kHz

Check: Confirm the 1/2fH of the waveform is 8.2±2kHz.

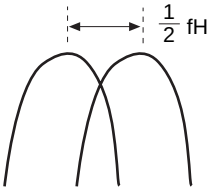

Fig.3-10

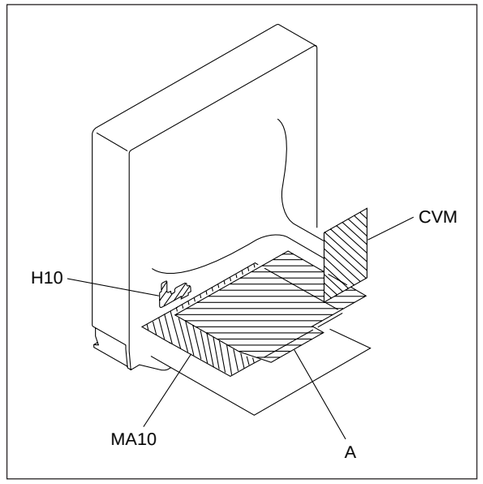
5-2. CIRCUIT BOARDS LOCATION



5-3. PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS

Note:

- All capacitors are in µF unless otherwise noted. pF: µµF
  Capacitors without voltage indication are all 50V.
- All resistors are in ohms.
  k = 1000 , M = 1000k
- Indication of resistance, which does not have one for rating electrical power, is as follows.

  Pitch: 5 mm
  Rating electrical power: 1/4W(CHIP:1/10W)

- : nonflammable resistor.
- : fusible resistor.
- △ : internal component.
- : panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- : earth-chassis.

- Readings are taken with a color-bar signal input.
- Readings are taken with a 10M digital multimeter.
- Voltage variations may be noted due to normal production tolerances.
- All voltages are in V.
  no mark : REC/PB
  ( ) : REC
  < > : PB
- Circled numbers are waveform reference.
- : B + line
- : B – line.
- : signal path.

SECTION 6
EXPLODED VIEWS

The components identified by shading and mark ⚠ are critical for safety.
Replace only with part number specified.

Les composants identifiés par la marque ⚠ sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

SECTION 7
ELECTRICAL PARTS LIST

A

NOTE:

The components identified by shading and mark ⚠ are critical for safety.
Replace only with part number specified.

Les composants identifiés par la marque ⚠ sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

RESISTORS
- All resistors are in ohms
- F : nonflammable

When indicating parts by reference number, please include the board name.

- CAPACITORS
  PF : μμ F
- There are some cases the reference number on one board overlaps on the other board. Therefore, when ordering parts by the reference number, please include the board name.
